Revenue funds may wait until December

Revenue from alcoholic beverage statistics and payments may be delayed until the new year, according to Peter Colonial, US Treasury information officer.

Premium payments remain toward a total of $30,000. However, the Treasury Department is working on a plan to distribute payments to states.

Local funds may be used for certain "high priority expenditures" approved by Congress. Cities may use funds for such purposes as public safety, environmental protection, and transportation and libraries.

As of today, there are still funds left to be distributed. No city has been allowed to use funds for any use not authorized by law. Although some cities may use the funds in lever, it has been reported that lever may not be used.

Death of area resident prompts investigation

The body of Donald Dwight Tank, age 25, of St Johns was discovered at his car on McNeil Street near West Taft Road on March 15, 1972. Tank had been dead for several hours.

The investigation is still ongoing, but details were not available by press time.

Shipman wins

ST JOHNS - The "luck" of the Irish held true for Sherri Martin, who won the Saint Patrick's Day Shipman's Football Contest.

Martin's entry was selected by a panel of judges, including the Clinton County News sports editor.

The contest was open to all residents of Clinton County.

"The Ear"

The attractive young lady peaking at you is Mrs Kathy Coletta of the Clinton County News office. She is the bride of Lee Shipman, a Telephone Company employee.

The couple was married in September 1971.

"The Ear" will be waiting for you.

In 75th year

Central National Bank

Wednesday night, Oct 15, at St Johns Hotel, Clinton County Branch held its thirty-third annual dinner meeting, celebrating the 75th anniversary of Central National Bank in Clinton County. The bank was opened on Aug 1, 1897 by Victor G. Briggs of the Grand Ledge Fire Department.

Awards were made to the following people:

Earl Feldpausch (left), winner of Bob's Chevrolet and Oldsmobile, and Kenneth "Kid" Dowd, general sales manager, Try out the driver's seat of a 1993 Oldsmobile. Discussing the antique auto with them is Robert Thompson, Central National Bank executive vice-president. The vintage Olds is on display through the end of the month in the Central National Bank lobby as part of their 75th year celebration.

STANLEY M. POWELL

... has proven worthy of your trust - you can depend on him - you can trust him with your vote.

Re-elect POWELL - REPUBLICAN NOVEMBER 7.
Court revenue, health costs mulled by Board

By ARTHUR WRIGHT

The board also discussed the Tri City Mental Health Fund and Tri-City Hospitals. The Board voted for additional $1,000 to the Mental Health Fund, and $2,000 to the Hospitals, and requested the Chair to write to the Governor and Congress, asking for more funds. The board will meet again on the 10th of May, 1972.

Gen Tel plans to spend $1 million

Cleveland, Ohio

The Cleveland City Council has approved a plan to spend $1 million to expand the Cleveland Telephone Company's service area. The plan includes the construction of a new exchange center and the installation of new lines and equipment.

Redwing Kevin Kight (10) heads for outside yardage in the St Johns - Hastings game Friday, Ag extra-point in overtime defeated the Redwings in Hastings taking a 14-13 decision. The Redwings, however, stil tied with Alma for the league lead.

Springport shuts out P-W
It's another O-E championship team

The defense held them off. Bullock Creek picked up a penalty. Another drive was stalled. DeWitt's spoiler streak ran by 2 Fowler defenders as Fowler defeated the Panthers Friday night to sustain a 6-0 unbeaten record for the season. The team felt he had made a "great effort" against Ovid-Elsie. The only score of the game was in the second period when time ran out. "Give the credit to the offense efforts of the freshman." said O'Donnell said it will be another "shutout for freshmen." Fowler continues streak with Homecoming victory. After breaking off a 2-point conversion, Coach DePaepe added a 2-yard touchdown to the Panthers. The victory when Fowler picked up a 22-yard touchdown from Flaherty who took Groom's place on defense, picked up a 7-yard touchdown from Ovid-Elsie, scored the winning touchdown. Ovid-Elsie made in 3 shutout Thursday, as Fowler defeated the Panthers Friday night to sustain a 6-0 unbeaten record for the season. Another shutout in the 3rd quarter when he charged in for his 6th rushing and another 108 yards in 15 carries against Corunna. He found the going rougher against O-E picking up only 33 yards in 12 carries against Ovid-Elsie. There's the kind of game it was. This DeWitt player finds himself marinated in "setting the pace of the game." as they consistently out hit their opponents. Four shutout Thursday when he scampered 15 yards for 6 points. DeWitt's Al Brown put the Eagles a quick 7-0 advantage. In the opening quarter when he led the Eagles a quick 7-0 advantage. In the opening quarter when he scored on a 4-yard scoring run Mel Pohl kicked the extra point to give the Eagles a 6-0 lead at the end of the quarter. Coach DePaepe added, "it was a great job" on the part of the players defense. Don Winkler played "outstanding" with 12 tackles including a fumble recovery that led to a touchdown. Coach DePaepe added, "it was a great job" on the part of the players defense. Don Winkler played "outstanding" with 12 tackles including a fumble recovery that led to a touchdown.

Dr. Sauders, local physicians discuss treatment issue

(From Front Page)

"I saw one and that's why there are a different breed and flavor in Michigan," said Saunders.

He said each week he hears reports of "second opinions" from those who warn they were treated, they pointed out, a different disease, in the same area each week also. What is surprising, especially to some physicians, is the number of second opinions, the number of patients who still don't want to take their business to the hospital.

The problem is the number of patients, the number of patients who still don't want to take their business to the hospital. We've been able to help many of these patients through the hospital's treatment of emergency care. The increase in the number of patients who still don't want to take their business to the hospital is a problem we are facing and we are working on it.

Where it's at on the
Clinton teen scene

St Johns High School
SJH Happenings
by Theresa Huard

Although the Homecoming events are over, Queen Anne Barber is still being celebrated by the student body. Now it's time to look at the next event: the Homecoming dance. The dance was held Saturday night, and the court members and other high school students danced themselves silly. The chairs were filled to the brim with students who were eager to enjoy the night.

The dance took place in the school's gymnasium, which was decorated with streamers and balloons. The music played throughout the night, and the students were Encouraged to dance and have fun. The dancing lasted until midnight, and then the students were ready to sleep off their energy.

Throughout the night, the students were judged for various events, such as the best-dressed, best-behaved, and best overall. The winners were announced at the end of the dance, and they were given ribbons and prizes.

The dance was a great success, and the students were happy to see their friends and have a good time. The Homecoming dance is just one of the many events that make the school year exciting and fun.
Mrs C T Liebman, left, state president of the Michigan Federation of Music Clubs is greeted by members of the St John Morning Musicale, center Mrs Mason Brouse, district president and right Mrs Washburn Brown, president of the local organization.

Obituaries

**Bruce Lanterman**

**Collecting antique cars comes AUTO-matically**

**ST JOHNS – Bruce Lanterman**

**By Lee Peters**

"I’ve had different antique cars all my life," Lanterman said. "I guess the oldest one I can remember was an old 1910s Buick. There was a 1928 LaSalle, a 1929 Packard and an old and beat down Studebaker," he revealed.

**THE 1 ANTIQUE AUTO**

A couple of weeks ago, Lanterman was in his garage with his family. He was looking at one of his antique cars. He pointed to the car and said, "I’m trying to sell this thing." The family looked at each other and laughed. It was clear that Lanterman was not serious. The family members all knew that Lanterman was a collector of antique cars. They also knew that he would never actually sell any of his cars.

In his home now is a 1928 Chevrolet, the same model car that Lanterman owned. He bought the car from a friend in the 1960s. The car is in excellent condition. "It’s not perfect," Lanterman said, "but it’s close." The car is a classic and is a favorite among car enthusiasts.

Lanterman is an active member of the St. Johns Historical Society. He is also a member of the city’s Planning and Zoning Commission. He is an excellent example of the old saying, "If you want to get ahead, do good work." Lanterman has been very active in the area of public service. Ron is just about to be awarded it has been easy for him to do good work. Despite his many responsibilities, Lanterman still finds time to pursue his passion for collecting antique cars.

Although Lanterman is a busy man, he finds time to work on his antique cars. He spends many hours in his garage, looking at his cars and dreaming of the day when he will be able to drive them again. Ron is not just a collector, he is an active participant in the antique car community. He is a member of the Antique Automobile Club of America and is involved in many of its activities. Lanterman is an active member of the club and is known for his knowledge of antique cars.

**Checkmate Agreement**

This is Clinton National Bank & Trust Co. The bank will make available to you a line of credit (including a checkable account with checkwriting privileges) to be used for the purchase of automobiles, goods, services, etc. This line of credit may have a maximum amount of $2,000, depending on your financial situation and creditworthiness. The money you receive is not interest-free. You will be charged interest on the amount of money you borrow, and the interest rate may vary from time to time. The interest charged will be at the prevailing rate of interest on loans to the same credit market segment. The interest rate will be determined by the Bank, and will not exceed the maximum rate of interest allowed by law. The interest rate will be determined at the time the check is issued, and may be changed from time to time. The interest rate will be determined at the time the check is issued, and may be changed from time to time. The interest rate will be determined at the time the check is issued, and may be changed from time to time. Clinton County News

Back Through the Years

From the Clinton County News Archives

ONE YEAR AGO

October 27, 1971

An attempt to change a problem with the Clinton County jail was introduced. The problem is the lack of a state-to-state "hot line" for a prisoner. The new bill was drafted by State Sen. Robert Griffin, D-Clinton County.

PROPOSAL L

Property Tax Reform

What would property tax reform mean to people in Clinton County? Presently our Constitution limits millage levies to 50 mills, exclusive of bonded indebtedness. A "yes" vote on Proposal C would cut the limit to 26.5 mills, exclusive of bonded indebtedness. It would set a fixed mill rate to support local school districts. Naturally, these school operating millages need to be replaced by some other form of revenue. The Proposal C limit has been in effect for four years by the state voters.

Six months after the passage of Proposal C, the voters in some Clinton County schools were again asked to vote on school millage. The proposed mill of 20.8 mills for the St. Johns Public School would cut the tax bill of a $10,000 home by $3.68. It is proposed that the millage be replaced by some other form of revenue. The Proposal C limit has been in effect for four years by the state voters.

An "except" vote on Proposal C would cut the limit to 26.5 mills, exclusive of bonded indebtedness. In the Clinton County Intermediate School district, the current mill rate is 22.51 mills. If the voters approved the proposed mill rate of 20.8 mills for the St. Johns Public School, the tax bill of a $10,000 home would be $2.60.

This proposal does not impose any new taxes to replace these. The 1973 Legislature would be directed to establish a program of taxation to support local school districts.

PROPOSAL D

Graduated Income Tax

This proposal is entirely separate from Proposal C's. It would simply eliminate the existing constitution limitation on millage which is a graduated income tax. This question already has been defeated twice in the past four years by the state voters.

Griffin talks about football TV blackouts

Professional football games, for the most part, are televised. Football fans in the west are lucky in that they get to witness the Monday night football games. "Monday night football" was created by the National Football League and since its inception has been a money-making proposition for the NFL and the networks that televise it.

PURPOSE OF LETTER

The purpose of this letter is to explain how my views and opinions have been formed. My views are influenced by what I read, see and hear. My views are also shaped by my personal experiences and my personal beliefs. I have been a football fan for many years and I have watched many football games. I have attended many football games and I have watched many football games on television. I have been a football fan for many years and I have watched many football games.

Professional football games are broadcast on television. Football fans in the west are lucky in that they get to witness the Monday night football games. "Monday night football" was created by the National Football League and since its inception has been a money-making proposition for the NFL and the networks that televise it.

Opinions on abortion reform

Rep. Allen urges Proposal C approval

Proposal C, he says, is the generally a healthy step. He says that he supports the proposal changes in Proposal C which are beneficial to the legislation. He says that the proposal is a natural step.

Proposal C, he says, is generally a healthy step. He says that he supports the proposal changes in Proposal C which are beneficial to the legislation. He says that the proposal is a natural step.

Proposal B, he says, is generally a healthy step. He says that he supports the proposal changes in Proposal B which are beneficial to the legislation. He says that the proposal is a natural step.

Proposal A, he says, is generally a healthy step. He says that he supports the proposal changes in Proposal A which are beneficial to the legislation. He says that the proposal is a natural step.

Proposal D, he says, is generally a healthy step. He says that he supports the proposal changes in Proposal D which are beneficial to the legislation. He says that the proposal is a natural step.

Proposal E, he says, is generally a healthy step. He says that he supports the proposal changes in Proposal E which are beneficial to the legislation. He says that the proposal is a natural step.
Waconsta

4-H Chatter

By JOHN AYLWORTH

4-H Bonanza now history

The 4-H Bonanza held Oct. 15 at the Waconsta School was a great success, with many visitors from the surrounding area in attendance.

The youth and others gathered in the gymnasium to view the exhibits and to enjoy the food. The evening started with a brief program, which included a welcome address by Mr. and Mrs. Charles Friday.

The next activity was to view the various exhibits, which were set up in different areas of the gym. Many of the exhibits were prepared by 4-H members from the surrounding area.

The program continued with a brief speech by Mr. and Mrs. Charles Friday, who thanked everyone for their participation.

The final activity of the evening was to enjoy the food. The menu included a buffet of various dishes, ranging from salads to main courses, and from desserts to drinks.

The 4-H Bonanza was a great success, and the organizers are planning to hold another event in the future.
Join the fun! You can win $20 cash, paid by The Clinton County News each week to the person who guesses the most winners of the high school and college football games listed on this page. Shop the ads and read the rules to find out how you can cash in!

1. Read every ad on this page. An important game will be listed in each ad for your selection.
2. On a separate sheet of paper, write the name of each merchant on this page and after his name, the name of the team you select as the winner of the game listed in his ad. List in sequence 1 thru 16.
3. Only one entry per person is allowed. Please write or phone for help.
4. Mail your entry to Contest Editor, The Clinton County News, St. Johns, before 6 pm Friday or deliver it personally to The Clinton County News office before 5 pm Friday. Mail must be postmarked no later than 6 pm Friday.
5. Contest winners will be announced each week in The Clinton County News.
6. Only one entry per person is allowed.
7. Retired—Your guesses plus the names of the merchants, must be on a SEPARATE sheet of paper ... not on this page.
8. See copy at left for tie breaker.
9. Remember—Your guesses plus the names of the merchants, must be on a SEPARATE sheet of paper ...
10. No entries will be accepted after 6 pm Friday. Contest winners will be announced each week in The Clinton County News.
11. Only one entry per person is allowed.
12. Remember—Your guesses plus the names of the merchants, must be on a SEPARATE sheet of paper ...
13. No entries will be accepted after 6 pm Friday. Contest winners will be announced each week in The Clinton County News.
14. Only one entry per person is allowed.
15. No entries will be accepted after 6 pm Friday. Contest winners will be announced each week in The Clinton County News.
16. No entries will be accepted after 6 pm Friday. Contest winners will be announced each week in The Clinton County News.

WIN
$20!
in event of tie, price will be divided equally.

NOTICES OF GENERAL ELECTION

STATE OF MICHIGAN

NOTICE OF ELECTION

General Election
Tuesday, November 7, 1972
To the qualified electors of the City of Lansing and of each township, city, village, school district, board, county, state, and the United States of America, and of the State Board of Education; two Regents of the State Board of Education; four Judges; and two County officers in each of the counties of the State of Michigan:

The method of repayment of the sum of $266,000,000 for veterans of the Vietnam and Other Wars, and the bonus thereof, shall be from the general fund of the state, including, but not limited to, the amount raised by the tax levied by the State Legislature; to require the State Legislature to provide for the payment of the principal and interest of the bonds issued by the State, for the purpose of electing, for the fiscal year ending June 30, 1973, candidates for the following offices: viz:

President and Vice President of the State University;

Two Trustees of Michigan State University;

Two Regents of the Board of Education;

Two Judges of the Court of Appeals;

Two Judges of the Supreme Court;

Two Judges in each Appellate District;

District Judge(s) in each circuit district;

Probate Judges in each county;

County Judges in each county;

County Commissioners, or such other corporative officers as may be elected therefor by the same law;

Also to be elected:

The Superintendents of Public Health, should this amendment be adopted?

The proposed amendment would enable the legislatures of the State to secure the payment of the principal and interest of the bonds issued by the State, for the purpose of electing, for the fiscal year ending June 30, 1973, candidates for the following offices: viz:

President and Vice President of the State University;

Two Trustees of Michigan State University;

Two Regents of the Board of Education;

Two Judges of the Court of Appeals;

Two Judges of the Supreme Court;

Two Judges in each Appellate District;

District Judge(s) in each circuit district;

Probate Judges in each county;

County Judges in each county;

County Commissioners, or such other corporative officers as may be elected therefor by the same law;

The method of repayment of the sum of $266,000,000 for veterans of the Vietnam and Other Wars, and the bonus thereof, shall be from the general fund of the state, including, but not limited to, the amount raised by the tax levied by the State Legislature; to require the State Legislature to provide for the payment of the principal and interest of the bonds issued by the State, for the purpose of electing, for the fiscal year ending June 30, 1973, candidates for the following offices: viz:

Ovid-Elies FFA chapter captures more awards

OVID-Elies—Ovid-Elies High School's Future Farmers of America (FFA) recently returned from the 46th National FFA Convention in Chicago with a potential of awards to add to their already impressive list of achievements.

The most judging competition was completed 2nd place placements in both the Herdsmanship and Swine judging contests with awards in both the Grand Champion Herd and Reserve Champion Herd categories. Ovid-Elies FFA advisor Bill Durward noted that this year's competition was tougher than in previous years due to the large number of entries. He added that the awards were "a tribute to the hard work and dedication of the students." The FFA chapter also earned the "Outstanding Chapter Gold Award" for the second year in a row. This award recognizes the FFA chapter's overall performance in areas such as leadership, membership growth, and chapter activities.

In the FFA's "Ovid-Elsie" Foundation, Inc. was presented the "Outstanding Chapter Gold Award," which is given to chapters that demonstrate exceptional performance in a variety of areas, including leadership, membership development, and chapter activities.

The FFA chapter also received recognition for their efforts in supporting the local community. They were awarded the "Outstanding Chapter Gold Award," which is given to chapters that demonstrate exceptional performance in a variety of areas, including leadership, membership development, and chapter activities.

In addition, the FFA chapter was presented with the "Outstanding Chapter Gold Award," which is given to chapters that demonstrate exceptional performance in a variety of areas, including leadership, membership development, and chapter activities.

The chapter received numerous awards for their efforts in community service and leadership, including the "Outstanding Chapter Gold Award," which is given to chapters that demonstrate exceptional performance in a variety of areas, including leadership, membership development, and chapter activities.

The chapter also received numerous awards for their efforts in community service and leadership, including the "Outstanding Chapter Gold Award," which is given to chapters that demonstrate exceptional performance in a variety of areas, including leadership, membership development, and chapter activities.

FORCES HIGHER ECONOMY WITH AUTOMATIC TRANSMISSION

1973 Year's Easiest Cars to Say 'YES' to
and get the best car deal you've ever enjoyed!

Imagine a world without traffic lights and think of the total confusion that would result.

If a proposed bill passes the U.S. Congress, every car manufactured will have its own version of traffic lights mounted on the rear end.

CRITICAL SAFETY: The lights would signal the actions of the driver to other drivers in cars to the rear.

This light cluster would include the following:

1. The present rear red lights which signal the application of brakes.
2. Two rear amber lights that are activated when both the gas pedal and brake pedal are not depressed. (Or when the driver is about to stop or about to start up again.)
3. Two rear green lights activated by a depressed gas pedal. (Or when the driver has started up again.)
4. Amber rear turn signals, integrated with the amber lights in Point 2.

It is estimated the system would cost $15 per car.

Purpose of the system is to create more exact communication between drivers. It is hoped by proposers of the legislation that the number of rear-end collisions would be markedly reduced.

About half of the accidents occurring on the highway are of the rear-end collision variety and ten percent of the fatalities result from rear-end smash-ups.

Cooling Systems Deserve More Than Anti-Freeze

Better Ask Service Technician For a Tune-Up No. 2

If your car is more than a year old, it is in line for cooling system problems or troubles. Could be a simple thing like a worn or cracked V-belt, a hose that's getting soft or brittle, a radiator cap that's not holding pressure. But, one thing's sure — when one part is about to give way, you can count on others needing attention, too.

So, don't stop your winter cooling system protection with just an anti-freeze check-up. Ask your service technician for a Tune-Up No. 2.

Here's what he'll do:
He'll thoroughly inspect and check all cooling system components — hoses, V-belts, water pump, thermostat, radiator cap, hose clamps. Then he'll replace worn or malfunctioning parts and get you up for carefree driving in any weather.

Cooling System Vital

Why is a cooling system tune-up so important? Remember, the cooling system of your car plays a vital role. It keeps the operating temperature of your engine at a level at which it performs at top efficiency.

To do this, automotive engineers came up with a pressurized cooling system. This permits the coolant to rise above the normal boiling point without "boiling over." Modern engines, for example, are engineered with cooling systems that must withstand pressures in excess of 15 pounds plus underground temperatures ranging as high as 220°. Keep in mind that the boiling point of water at sea level is 212°.

Heat's Damaging

These high heats and great pressures are bound to put a strain on all parts of your car's cooling system. Just one defective or worn part can cause your engine to overheat with possible extensive and costly repairs following quickly.

So don't let the fact that you may be driving a late model car tell you into thinking nothing can happen. A cooling system tune-up is even more important to your car, simply because its higher running temperature makes cooling system parts wear fast.

Calling a Car! What looks like a telephone dial is actually a device to test whether a driver is in condition to operate the car. Developed by General Motors, the Physlester requires "dialing" 4*4 to test whether a driver is in condition to operate the car. The distributor regulates the sequence in which spark plugs are fired to provide the power that drives the wheels. When the distributor is out of adjustment, the firing time is off and the engine won't run smoothly.

Alternator

A politician in an election year

That's clear. They're both involved in "current" events, but the car's "current" is electrical. The alternator replaces the generator found on older cars and, like the generator at your local power plant, provides electricity to keep things running.

Tune up

It's a series of adjustments made to make your car run more smoothly and include checking the spark plugs, condenser and points, and adjusting the carburetor.

Idle...adjustment

Putting your brother-in-law to work

Your car's idle — the rate the motor turns over at low speed — needs adjusting now and then to give smoother carburetion and performance.

New points

Tips on social etiquette

The points are part of the mechanism controlling the firing of the spark plugs. When they become worn or pitted, the firing is affected and the car is harder to start.

Spark plug

Barney Google's horse

You're getting closer. They do affect the horsepower! Spark plugs are ceramic and metal electrodes designed to permit electricity from the distributor to arc in the cylinder head. The electric arc ignites the gasoline, which, in turn, drives the piston down to provide power. Normal driving erodes or fouls the electrodes, requiring periodic adjustments or replacement.

While the tongue-in-cheek definitions given above are designed to be humorous, the explanations point to a very real problem — the proper care for your car. The American Petroleum Institute strongly recommends that you have your auto checked periodically for safety's sake and to help prolong car life.

Keeping your car properly tuned can help solve the pollution problem, too. Did you know, for example, that one bad sparkplug can cause your car to emit 25 times more hydrocarbons into the air? Or that a really rusty carburetor can mean that as much as one gallon of gasoline in every tankful will escape into the air unburned? It pays to make car care a part of your driving habits.

Choosing-up Should Help Car Value

If you're thinking of trading in your car, a few dollars and a few ounces of elbow grease can increase its value considerably. Assuming your car is in good mechanical condition, the following cosmetic touches should help bring you top dollar on your trade-in.

1. Clean engine block of excess grime
2. Scrub out the trunk
3. Touch up nicks and wax the car
4. Clean door mats and replace them if badly worn
5. Clean upholstery
6. Clean the headlining and dash
7. Clean scratch marks from the door siding
8. Make certain all lights and turn signals are working
9. Polish chrome trim and remove rust from pitted areas

Let Jim McKenzie insure your Car & Snowmobile and enjoy carefree winter driving and fun.

Tune-Up Now, Avoid Winter Motoring Hassles

Does the thought of wrestling with a stalled engine this winter give you chills? The American Automobile Association says you can avoid this seasonal hassle by putting into practice a few basic guidelines for getting your car under way smoothly.

But before winter arrives, AAA urges every car owner to take his car in for a complete tune-up and inspection. Especially important is a check of the car's electrical system. In 1971, AAA estimates show 49 per cent of the nation's 82.6 million motoring problems resulted from battery and electrical failures.

Battery Check

Batteries should be checked frequently. At 32 degrees, cranking power is about 40 per cent less than when the temperature is 80 degrees; and at zero, about 60 per cent less.

During extended periods of cold weather, starting the car and running the engine at least every other day at sufficient RPM's to charge the battery, and running the engine at 80 degrees; and at zero, about 60 per cent less.

And if parts are needed, insist the replacements be Gates—top-quality V-belts, radiator hose and caps, heater hose, thermostats. They're available everywhere.

Starting Tips

Once the inspection has been completed, and that first cold morning has arrived, here's AAA's advice on how to get your engine started with a minimum of trouble:

• Make sure the shift selector or gear shift is in neutral. If the car has a manual shift, depress the clutch while starting.

• Avoid a "battery strain" by making certain all electrical accessories (radio, lights, heater) are turned off before using the starter.

• Depress the gas pedal all the way down to the floor once, then hold it halfway down as the starter is engaged. Do not pump the gas pedal, because this can result in flooding.

• Turn the ignition key to "start," but don't hold the key in the start position for more than 10 seconds at a time. Continuous grinding of the starter can damage the battery, and even drain a fully charged one.

• Depress the gas pedal slightly to keep the engine running if the engine starts and then dies a number of times.

• If the engine becomes flooded, depress the gas pedal to the floor and hold it there while engaging the starter. Keep your foot on the pedal until the engine starts again. Then release it slowly. Remember, do not pump the pedal.

Getting your car moving in a heavy snowstorm shouldn't present too great a problem if you follow these tips:

• Start with an "easy" foot on the accelerator and slip the clutch in second gear on cars with standard shift. Don't spin the wheels. You'll find that traction is greatest just before the wheels spin.

• If the wheels should spin, try rocking the car forward and backward. If you've dug yourself into a pocket, use sand or traction mats to get out. Keep the front wheels pointed straight ahead when possible.

• Once the car is under way, keep moving.

Don't blow your cool!

GET TUNE-UP NO. 2

Avoid engine overheating, road breakdowns, costly repairs by asking your service station operator for a Tune-Up No. 2— a thorough check of your car's entire cooling system before the trouble starts.

And if parts are needed, insist the replacements be Gates—top-quality V-belts, radiator hose and caps, heater hose, thermostats. They're available everywhere.

It's more than just a slogan.

Much more. Winter tests on motorists' cars showed that untuned cars had over twice the "won't starts" tuned cars had.

A major reason for this is worn spark plugs. They demand twice the voltage of plugs in good condition. And on a cold day, your battery supplies less voltage. When the supply can't meet the demand, your car won't start. No matter how hard you try.

Finally, AAA would like to put to rest one myth about traction. Traction, the measure does not increase traction. And it can result in a loss of control.

Untuned cars face winter starting woes

Tests certified by the United States Auto Club showed untuned cars had over twice the "won't starts" tuned cars had. Good reason for you to get our expert engine tune-up today.

Enjoy winter driving.
WE FEATURE THIS AREA'S
FINEST AND MOST COMPLETE
SERVICE FACILITIES

- Complete Engine Tuneups
- Transmission Repair
- Radiator Repair (Cars, Trucks, Tractors)
- Complete Ignition and Carburetor Testing by the Very Latest Sun Equipment
- Glass Installations
- Full Axle Repair Rear
- Header Core Repair
- Wheel Alignments
- Wheel Packing
- Complete Body Shop Service
- Air Conditioning Service

TRUCK SERVICE REPAIR AVAILABLE AFTER HOURS BY APPOINTMENT

SERVICE DEPARTMENT HOURS:
7:30 A.M. - 9:00 P.M. MONDAYS

Properly Aligned Wheels Add Miles to Tire Life

By CHUCK STROBERG
Chassis Produm Manager
TRW Replacement Division

Just as there are timing and ignition gap settings that combine to provide a well-tuned, efficient engine, there are camber, caster, and "Toe" settings to maintain the operating quality of the chassis.

These are adjustable angles that must be maintained to provide a true running front end that will allow tires to give their maximum service life.

Camber is a measure of the tilt of the top of the front wheels to or away from the vehicle body. Ideally, for long tire life, the camber angle is zero. This condition can castor be a tire wear factor.

Caster is the alignment angle used to measure the forward or rearward tilt of the steering axis of the front wheels, when checking from the side view. It's effect on the vehicle is mainly concerned with steering and handling. Under very extreme conditions, caster can cause looseness. The change in the relationship of the parts to each other that is created by this wear can lead to variable or incorrect "Toe" settings that are a real hazard to tire life.

"Toe" settings are a real hazard to tire life. The "Toe" specification concerns the ability of the wheels to roll ahead freely without skidding across the road surface. The ability to hold the proper "Toe" setting is distinctly affected by the condition of the parts in the steering system. This chassis system which includes the idler and pitman arms, tie rod ends, and centerlinks, connects the two front wheels and has the job of transmitting the driver's directional desires to them.

"Toe" settings would occur before tire wear became a problem.

The three adjustable alignment angles, "Toe" has the greatest effect on tire life. The "Toe" specification concerns the ability of the wheels to roll ahead freely without skidding across the road surface.

The ability to hold the proper "Toe" setting is directly affected by the condition of the parts in the steering system. This chassis system which includes the idler and pitman arms, tie rod ends, and centerlinks, connects the two front wheels and has the job of transmitting the driver's directional desires to them.

"Toe" settings are normally used to achieve the greatest effect on tire life. The "Toe" specification concerns the ability of the wheels to roll ahead freely without skidding across the road surface. The ability to hold the proper "Toe" setting is directly affected by the condition of the parts in the steering system.

"Toe" settings are normally used to achieve the greatest effect on tire life. The "Toe" specification concerns the ability of the wheels to roll ahead freely without skidding across the road surface. The ability to hold the proper "Toe" setting is directly affected by the condition of the parts in the steering system.

A cooling system tune-up doesn't take long—only about an hour and a half. And the cost is small compared to that of emergency service or major repairs.

In case your service station attendant or garage mechanic doesn't know about Tune-Up No. 5, ask him to check his flat-rate manual, or write to The Gates Rubber Company, 999 S. Broadway, Denver, Colorado 80217. Or, hand him this list of service points:

1. A visual check of coolant level for indication of leaks or excessive oil content.
2. Check with pressure tester for internal and external leaks.
3. Visual check of oil for water content.
4. Test thermostat for proper opening and closing.
5. Check of heater valves.
6. Check heat gauge for accuracy.
7. Drain and back flush cooling system.
8. Check water pump bearings.
9. Check fan blades and pulley for alignment and balance.
10. Test radiator pressure cap.
11. Check radiator neck cap seal for nicks or scratches that could release pressure.

Squeal Calls for Attention

If your car has power steering and when you make a hard turn, you hear noises like the squeals of a wild banshee coming from somewhere under the hood, chances are pretty good you have a set of V-belts that are loose. And loose belts could also be the reason why your air-conditioner didn't cool up to par last summer—or why your generator or alternator isn't charging properly, or why your engine is overheating.

Fan, water pump, power steering, air-conditioning, generator or alternator—all these are operated by V-belts. And, to do their jobs effectively, The Gates Rubber Company says these belts must be tensioned properly, to factory specifications.

Your service technician can provide this service. You can easily check the belts yourself. With engine off and hood up, press down with your thumb on the belt midway between the pulleys. If there's more than just a little give, the belts are probably too loose. But, unless you have the proper equipment and are especially handy with tools, let your serviceman do the replacing.

Wouldn't you know that day you couldn't get your car started you also got a letter from your bank saying your account was overdrawn? Strange as it may appear, there is a parallel between these two unfortunately common misfortunes.

It's easy to see why you got that overdraft from the bank. Your income couldn't match your outgo. The same situation probably occurred inside the engine of your car and resulted in the starting trouble, says Champion Spark Plug Company.

System Explained
The ignition system income is called Voltage Available. In simple terms, that's the voltage that is provided by the electrical system and beefed up by the coil to fire the spark plugs. The "outgo" is called Voltage Required, or the juice needed to fire the spark plugs efficiently.

A healthy system would provide about 25,000 volts to the plugs. When the plugs are in good condition, they require about 7,000 volts to fire. All things being equal, there should be plenty of Voltage Reserve in the ignition bank.

Even with your engine in top condition, when winter comes there is an extra strain on your car's starting ability. Cold or damp weather takes its toll. For example, at freezing temperature, the battery is only working at 60 percent of its strength. So there is less voltage available.

Deteriorated ignition system components also cut into the voltage available to the spark plugs. For example, spark plug wires that are worn or cracked leak away vital voltage. Distributor components like points, rotor and cap must be in top shape to help provide a healthy spark.

When Voltage Needed
Fresh spark plugs should be able to function well even with reduced voltage available. But when the plugs themselves are worn, the voltage requirement goes up. A set of plugs with 10,000 or more miles usage can require several thousand more volts to fire them. If they are badly fouled, they may not even fire at all.

DOES YOUR INSURANCE INCLUDE A FAST CLAIM SERVICE?

Whether you have auto, fire or personal liability insurance, you can depend on our fast claim service. Our trained staff of agents will serve you fairly and efficiently. For fast, courteous help, depend on our agency!
