March 8, 2016

To the Honorable Chairman and
Members of the Clinton County
Board of Commissioners

Dear Board of Commissioners:

In accordance with the provisions of Chapter 2, Section 31, of the Michigan Drain Code, which is Act 40 of the Public Acts of 1956, as amended, I respectfully submit my Annual Report for the Clinton County Drain Commissioner's office for the year ending December 31, 2015.

This report summarizes the activities of this office for 2015 and provides financial information for each of the active drain accounts for our county drains. It also includes comparative historical data that may be of interest to readers of this report.

Personally I will remember 2015 for the several summer extreme rainfall events that seemed to punish the very southern portions of the county. The result of these events was a high number of petitions being filed to improve existing county drains and more interest in establishing new county drains. This has been a challenge to deal with due to the limited amount of staff to assist in these matters.

While petitions are often driven to solve specific problems and tend to be very time consuming, maintenance of our existing drains continues to be the focus of most of our work. By statute, we are able to expend up to \$5,000 per mile per year for maintenance work. This can be exceeded in an emergency or by a resolution from the affected township. Last year the Westphalia Township board approved a resolution for the Stump and Hengesbach Drain which allowed us to clean out the entire length of the 3.07 mile drain in 2015 rather than spreading the work over multiple years. As required, the assessment was spread over two years to keep the project affordable to the district property owners.

The reduced availability of qualified contractors to complete maintenance projects has limited the amount of work we are able to get completed. We are always looking to utilize contractors within the county to help us complete our tasks.

We've long had great need to be able to manage our infrastructure in a way that allows for better scheduling of maintenance before problems arise rather than responding to problems. Last year we were able to purchase Lucity, an asset management software package that will aid in improving office work flows, planning and managing of projects, tracking equipment use, and inventory of supplies. There is much work to be done to inventory all of the county drain infrastructure, including open ditches, enclosed tile, manholes, catchbasins, culverts, bridges, etc. in order to fully utilize the capability of the software.

Several years ago we were able to purchase a used tile video inspection camera system from a neighboring county. This system has been quite useful to us through the years, however, we incurred significant costs for repairs. We plan to purchase a replacement system which we hope to have in operation in the spring of 2016. With the new system we will begin the process of inspecting and documenting the condition of all of our enclosed drains to further identify needed maintenance. Staff will be available to assist local municipalities should they have a need to perform similar inspections on their infrastructure.

We did not acquire any new equipment last year, however, we did identify several pieces of equipment that we no longer use. We look to sell this used equipment at auction to help offset the costs of purchasing the new camera system.

A common misconception of many residents is that the county provides funding to pay for drain projects. All drain work is ultimately paid for through assessments to the landowners in the benefitting drainage districts along with the local municipalities. The county only contributes the portion of the costs determined to benefit county roads. Clinton County is rather unique in that we hold a day of review of apportionments for each drain we assess. Last year we mailed out over 7,300 day of review notices. This gives me the opportunity to notify taxpayers of pending drain assessments on their property and provides landowners and municipalities the opportunity to contest their apportionment or their percentage of the total cost.

As expected, the total amount of drain assessments in 2015 increased significantly from 2014 and was the highest total amount since 2003. This was due to two petition projects and assessing several of the larger drainage districts in the county, which typically involve higher dollar assessments. I do expect the total to remain relatively high in 2016 if we are able to get several of our current petition projects underway by August.

We've noticed that residential development in the form of subdivisions and condos are beginning to pick up, which adds to our work load. Ridge Rock in DeWitt Township added another phase consisting of 27 lots, and Hawk Nest Condos in East Lansing added 76 new units. While this does not sound like much, it is the greatest number of new lots to be added in several years. For years, builders have been utilizing available building lots left over from before development took a downturn.

Quite often legislative changes are made that affect the Drain Code or other state acts that involve this office. However, there were no significant actions in 2015 that affected our operations.

2015 Summary

The following bullet points offer a brief summary of 2015 Drain Commissioner's office activity:

- Performed general maintenance work or inspections on 305 drains.
- Cleaned out 18.21 miles of open drains.
- Performed major right of way clearing work on 6.40 miles of drains.
- Replaced 1.70 miles of enclosed tile drain.
- Assessed a total of \$1,121,623 to 106 drainage districts.

- Completed work on three petitioned projects; #436 Cutler & Extension Drain, #498 Fowler Extension No. 2 Drain, and the #927 Willard Cahoon Drain.
- Received and processed petitions for the #658 Miller & Foster Drain, #477 Faiver & Branch Drain, #950 Carter-Burke Drain, #068 Wilderness Drive Drain, and the #956 Timber Ridge Drain.
- Provided a petition for landowner circulation on the #696 Oliver Fish Drain.
- Provided Applications to Lay Out and Establish a Drainage District for three new drains.
- Held Board of Determination meetings on four drains.
- Reviewed or inspected 67 site plans or subdivisions/condominiums.
- Performed herbicide applications on 56 drainage systems totaling over 57 miles.
- Secured financing for 34 maintenance or reconstruction projects totaling \$856,800.
- Processed 1,019 drain orders totaling \$2,437,520.
- Received one township resolution to allow us to exceed the statutory spending limit for maintenance.
- Acquired and began implementation of Lucity asset management software.
- Received three Notice of Claim forms for PA 222 (of 2001) alleging county responsibility for flooding of homes. All claims of damage were forwarded to the County Administrator and to Michigan Municipal Risk Management Authority for further consideration.

As I begin my 31st year working in the Drain Office and 11th as Drain Commissioner, I wish to publicly thank my dedicated staff of long-time employees. They are Jon Morrison, my Deputy and staff Engineer; Lynn Cech, Administrative Aide; Cheri Theis, Drain Accounting Specialist; Brian Lawless, Construction Inspector; and David Seeger, Maintenance Worker. Together they combine for over 88 years of experience with this office and deserve the credit for our successes. Together we strive to make dealing with the drain office a positive experience. I also thank the Board of Commissioners, the Road Commission staff, local units of government, and the county residents for their continued support.

Sincerely,

A handwritten signature in blue ink that reads "Phil Hanses". The signature is written in a cursive, flowing style.

Phil Hanses
Drain Commissioner

Construction Completed in 2015

#436 Cutler & Extension Drain – Located in Sections 4, 5, & 8, Watertown Township

This drain was originally petitioned in April of 2013, and the Board of Determination meeting was held in August of 2013. The project engineer was Eng. Engineering and Surveying. The existing drain tile that was installed in 1912 was relocated, enlarged, and replaced to address several areas of flooding within the drainage district. Bids were opened on April 29, 2015, and Mid-Michigan Ponds, the low bidder, was selected to complete the construction. Construction was completed in the fall. Dart Bank provided the financing for the \$315,000 project at an interest rate of 2.00% over 12 years.

#498 Fowler Extension No. 2 Drain – Located in Section 36 of Lebanon Township and Sections 1, 12, and 13 of Dallas Township and the Village of Fowler

Several occurrences of flooding over M-21 near the Quality Dairy store in Fowler ultimately led to the filing of a petition by the Village of Fowler to correct the flooding situation. Following the April 14, 2014 Board of Determination meeting, Spicer Group was hired to design an improved drainage system from the Fred Meijer CIS Trail southward. New concrete storm sewer was installed during the summer months by Roy Pung & Sons who completed the \$479,000 project. The Michigan Department of Transportation (MDOT) paid over \$285,000 of the project costs as a supplemental benefit to M-21, and the remainder of the project will be assessed to the drainage district over two years. Joanne Lee provided the financing for the project at an interest rate of 0.99%.

#927 Willard Cahoon Drain – Located in Sections 11, 13, 23, & 24 of Greenbush Township

A petition was received in December 2013 subsequent to meeting with a landowner interested in seeing improvements to the drain. During the spring thaw the area experienced significant flooding of Chandler Road and the surrounding farm land. The Board of Determination meeting was held on May 7, 2014, and the Board determined a project necessary. Engineering and design of this project was completed by drain office staff. The bid opening for construction was held on July 13, 2015 with Northwest Excavating coming in as the low bidder. Work began in August and was completed in November. The total project cost was higher than anticipated at \$160,000, so the assessment is being spread over six years. Joanne Lee provided the financing for the project at an interest rate of 1.91%.

Ongoing From Prior Years

#897 Waltz and Sturgis Drain – Located in Sections 1, 11, 12, and 14 of Dallas Township and Village of Fowler

In April of 2013 and in prior years, flooding of local streets and residences had occurred in the southwest quadrant of the Village of Fowler. Following the flooding in 2013, I was contacted by the village DPW staff with thoughts of modifications to the drain. I contacted Spicer Group to analyze the conditions of the drain to determine what changes would be most effective to reduce the chances of flooding. I shared the engineer's findings with the Fowler Village Council at their March 2014 meeting. At their April 14, 2014 meeting they voted to petition for improvements to the drain. Fowler was hit with flooding rain events on June 18, June 24, and again on July 5 of that same year. A Board of Determination meeting was held July 9, 2014, and the Board determined a project was necessary.

Several design alternatives were presented to district property owners on March 25, 2015. The preferred and most cost-effective solution was an innovative idea of creating several berms along the length of the natural valley in the upper portion of the watershed to temporarily store water in various locations to control the rate at which water reaches the county drain south of Fowler High School. This concept

required coordination and buy-in from the upstream landowners, which ultimately was not well received. Plans then shifted towards creating a regional detention area at the upstream end of the county drain to store excess storm water and release it at a rate that would not overwhelm the capacity of the downstream drainage infrastructure. Efforts to acquire an easement or otherwise purchase the necessary land were not successful, so I had to make the difficult decision to begin condemnation proceedings to acquire a 13 acre piece of property on which the detention area will be constructed.

A Hazard Mitigation Grant application has been submitted to FEMA in hopes of acquiring up to 75% of the project cost from the grant. The project team believes that application will be successful, however, delays in the approval process have been frustrating and have delayed land acquisition and construction. The project will involve building the new detention area, increasing the capacity of an existing detention area behind the high school, enlarging up to four road culverts in the village, enlargement of portions of the existing tile drain, and improvements to the open ditch through the village. We are hoping to begin construction during late summer or early fall. Even with the expected grant funding, I expect the project costs will have to be spread over multiple years.

#720 Peck Drain – Located in Sections 4, 5, 8, & 9 in Essex Township and Village of Maple Rapids

The drain was petitioned by landowners in June of 2012 and was determined necessary at an August 10, 2012 Board of Determination meeting. The project will involve extending the drain eastward to provide an outlet for farm drainage and making minor improvements to the existing open drain system that has not had significant maintenance since it was constructed in 1879. Fleis and Vandenbrink Engineering was selected as the project engineer.

Plans for this project have been ready for bidding for a couple of years. However, we experienced a very lengthy delay in acquiring a needed easement across the Department of Natural Resource's property. The easement was finally executed by the DNR on November 19, 2015. An informational meeting will be scheduled shortly to update district property owners of the project plans after which a bid opening and Day of Review of Apportionments will be scheduled. Construction will likely take place during the late spring or early summer months. The required work will be relatively minor, and costs should be manageable by district taxpayers with the assessment being spread over four or five years.

New Petitions Filed in 2015

#658 Miller and Foster Drain – Located in Section 5 of Watertown Township

In the summer of 2014, I was contacted by a landowner in the Miller and Foster drainage district who was concerned with flooding and poor drainage of his property. The Miller and Foster Drain does not exist on the property, however a private drainage tile that crosses the property does outlet to the county drain. I discussed options to repair the drain with two of the landowners involved, and it was decided that extending the county drain to include the private tile would best serve the landowners. In December, I provided a petition to extend the drain to the landowner for signatures. The petition was returned at the end of February 2015. A Board of Determination meeting was held on July 7, 2015, and the project was found necessary. I am working with DC Engineering to complete construction plans that will involve replacing a portion of the existing tile drain that is in poor condition, converting a portion of the existing tile drain to county drain, and installing new drainage tile along Wacousta Road to address flooding concerns in the upper reaches of the watershed. It will be necessary to revise the drainage district boundary to service these upstream lands.

This is a very small drainage district, and assessments will be high, so I plan to hold an informational meeting for the district property owners once plans are complete and estimated costs are known. Following that meeting I will reevaluate the district property owners' desire to move forward. If construction proceeds as expected this fall, the costs will likely need to be assessed for as many as 10 years.

#950 Carter-Burke Drain – Located in Sections 13 and 24 of Watertown Township.

A heavy rain event on June 23, 2015 caused flooding of several homes in the Watertown-On-The-Meadow subdivision. This has been a periodic problem in years past, and petitions provided to affected property owners had not been returned. However, the June flood event renewed interest in the petition, and it was finally returned to this office on July 19, 2015. A Board of Determination meeting was held on September 24, 2015, and the Board found that the work as petitioned was necessary. On this project I am working with Eng. Engineering and Surveying to address the flooding in the subdivision. Survey work has taken place, and conceptual designs have been discussed. As part of this project, the engineer is also reviewing the capacity of the tributary Rosewood Hills Drain which has experienced some street flooding in the past. A construction timetable has not yet been determined, but I'm hopeful that work will be completed by late fall.

#477 Faiver Drain – Located in Section 7 of DeWitt Township and Sections 1 & 12 of Watertown Township

The western portion of Lakeside Preserve subdivision in Section 12 of Watertown Township has experienced several flooding events since the subdivision was developed. The subdivision has its own storm sewer system that is tributary to the Faiver Drain. Several enhancements have been made to the Lakeside Preserve drainage system to maximize its drainage capacity, however large intense rain events continue to overwhelm portions of the system that take in the runoff coming from upstream undeveloped areas. On July 27, 2015 a petition was filed aimed at constructing a new branch to the Faiver drain that would intercept the upstream runoff and redirect it around the subdivision. A Board of Determination meeting was held on October 13, 2015, and the project found to be necessary. I've previously worked with Spicer Group to study flooding within the subdivision in Lakeside Preserve, and I've selected that firm to move ahead with plans for a new branch drain. I anticipate that construction of the new branch will take place in late 2016 if the necessary easements and permits can be acquired.

#068 Wilderness Drive Drain – Located in Section 3 of DeWitt Township.

Residents along the east side of Wood Road recently experienced an increase of flooding events. A previous landowner had made landscaping changes that appears to have changed or obstructed the outlet of an existing cross road culvert under Wood Road. On August 20, 2015 the Clinton County Road Commission petitioned to extend the Wilderness Drive Drain to address the problem. A Board of Determination meeting was held on November 2, 2015 in which the Board found the petitioned work necessary. I'm working with LSG Engineering to develop alternatives to address the flooding situation. It is anticipated that the drain will be extended to and along Wood Road. I expect that construction can be completed during 2016.

#956 Timber Ridge Drain – Located in Sections 28 and 33 of Bath Township

The Timber Ridge Drain was established through a November 6, 2015 petition to serve as a county drain outlet to what would become the Timber Ridge and Timber Ridge Highland Condominiums. Both condominium projects currently have a private storm sewer system maintained by the respective condominium associations. The June 23, 2015 storm caused the flooding of at least one home in the condo project. The condo association had meetings to discuss the situation, and ultimately residents asked for a petition to dedicate the private drain system as part of the Timber Ridge Drain. The petition was returned to this office in December, 2015, and I am currently meeting with engineers to discuss options before setting a date for the Board of Determination meeting and appointing members to serve on the Board.

Applications to Lay Out and Establish A Drainage District

Riverside Drive Drain – A proposed drain in Section 18 of Watertown Township

Several instances of flooding of homes along Riverside Drive have occurred in years past. This had brought interest in establishing a new county drain to address the situation, but required paperwork was never returned to this office. The June 23, 2015 flood event renewed interest in the establishment of a county drain. An informational meeting was held at the Watertown Township Hall on August 25 in which the drain establishment process was explained. The first step in the process, filing of Application to Lay Out and Establish a Drainage District was received in this office on September 16, 2015. The Watertown Township Board voted to advance a \$2,000 deposit at their October meeting to allow me to move forward with the process. I have contracted with DC Engineering to perform preliminary survey work to identify drainage district boundary and recommend a route and course for the drain. Once that is complete I will establish the Drainage District and prepare a petition for circulation by district property owners. After a valid petition is received, I will schedule a Board of Determination meeting.

Looking Glass Brook Drain – A proposed drain in Section 18 of Watertown Township

A few instances of flooding of homes along Looking Glass Brook Road have occurred in years past. Efforts to address this situation privately have not been successful. A June 23, 2015 flood event renewed interest in solving the problem. An informational meeting was held at the Watertown Township Hall on August 25, 2015 in which the drain establishment process was explained. The first step in the process, filing of an Application to Lay Out and Establish a Drainage District was received in this office on January 12, 2016. The required \$2,000 deposit was recently received from Watertown Township allowing me to move forward with the process. I have contracted with DC Engineering to perform preliminary survey work to identify drainage district boundary and recommend a route and course for the drain. Once that is complete I will establish the Drainage District and prepare a petition for circulation by district property owners. After a valid petition is received I will schedule a Board of Determination meeting.

Petitions Prepared for Circulation but Not Filed

Lewis Drain – A proposed drain in Section 10 and 11 of Riley Township

I have had conversations with a landowner dealing with occasional surface flow coming from a cross-road culvert and draining across his property. Recent road ditch cleanout work seemed to exacerbate the situation and heightened his interest in constructing a county drain. On March 6, 2015 I provided the landowner with instructions for circulating an Application to Lay Out and Designate a Drainage District. To date that application has not been returned, so no further action will be taken until such time the application is received.

#696 Oliver Fish Drain – Located in Sections 16 and 17 of Ovid Township

The tile portion of this drain was constructed in 1919 and has required a fair amount of maintenance work over the last several years. Upstream landowners would like to improve drainage of their properties, however capacity of the Oliver Fish Drain has been a concern. On July 10, 2015 I provided a petition to the interested property owner with instructions for circulation for signatures. The petition would allow for reconstruction and enlargement of the tile drain. To date I have not received any further response to this issue.
