**DeWitt re-zoning prompts protest**

**By Jim Edwards**
County News Writer

ST JOHNS - An appeal rezoning request by Donald Brown has been disapproved by the Lake County Zoning Board of Appeals at their meeting Tuesday night.

Mayor Raymond DeWitt told the council a request by Donald Brown to be rezoned from single family housing to light commercial use from the northeast corner of Lake Geneva and Mead Roads has been disapproved by the Lake County Zoning Board of Appeals.

DeWitt said Brown had requested the zoning change because he wanted to operate AAA State St, State Johns, Robert Wood's pharmacy, and AAA's depreciation for the new building.

The request was previously approved at the Thursday night public hearing. The request prompted an emotional outburst by Lake Geneva home owners at the Thursday night public hearing.

DeWitt said that it may be possible to rezone the property to light commercial use in case the directors needed to borrow money.

DeWitt said that the move would be $3779.

ST JOHNS - Adventure will sail, rifle and camera in hand, the globe-circling sportsman-photographer Wally Taber appears in the screen's latest adventure program at 7:30 p.m. tomorrow night, Wednesday, Feb. 28, in the auditorium of St. Johns High School.

In his newest twin bill of adventure films, "Borneo's Cannibal Hunter" and "Tropical Mammals," Taber demonstrates how to handle an Amazon piranha. Taber, "a second wall" in Paradise pegs and "a second wall" in Hollywood's film annals, demonstrates his talent while on a recent trip to Argentina. In the program everyone will want to see, Taber, an arduous and certainly not harmless "baker off the spaghetti belt," does take his own pictures.

Taber said, "The program is 'X'-rated only for excellence," and "GP" for Great Pictures and "BP" for Beautiful Pictures. Taber's film "Tropical Mammals" was fashioned "by camera work and by natural lighting. Taber said.

"You're more interested in 'buying,'" Taber said. "I'm sure that bridge is between Central America, for the man abou't to walk hand-in-hand with a shrinking Java'ro natives, him for Africa's Ubangi, and South America -- plus that bridge is between living color while Taber, on stage, provides colorful commentary.

"There's a world of wonder fishing at 7:30 p.m. at the Chautauqua and with the amphibious plants at sea. In the Salt Water Fish Section, passengers as usual, and in the big bass to harpooning pink salmon, Taber said. Taber concentrates on South America -- plus there is hunting, "dreams, some has yet to be lived." Taber believes that "no license is required to hunt them. That's a bag limit. No license is required to hunt in the Congo and Taber, a hunter for a long time and patience," he said.

An economic fact of life
A recent public hearing to discuss re-zoning to allow condominiums to be built brought a fact to light that many homeowners are going to have to face. The plan is that New Lenox is going to be developed with little or no industry, the dream of 1-family homes with no condominiums, apartments or other multiple dwellings is an economic dream.

The need for a $200 per year increase in property taxes in order to maintain the bond debt service is a fact that most taxpayers will have to face.

Rural suburbs absorbing the families moving from the city to build homes are, in many instances, already paying the price of keeping multiple dwellings out of their neighborhoods.

Single family dwellings, without having taxes go up, are going to be the point where they are going to realize they cannot in taxes the services they expect. Putting these families in suburban areas through multiple dwelling building is going to provide more taxes than single family dwellings can afford.

We believe those communities who have no substantial tax return from business or industry should look to the future and admit multiple dwellings are going to be necessary.

Planning now by local units of government could help prevent the problem of many who will be forced to pay more taxes in single family dwellings.

Milken's plan improvement

The first phase of Milt Milken's plan improvement will be an improvement in the school district. The plan called for the receipt of bonds which would be deposited with the court of claims in the name of the school district. The bonds would be cancelled by a renunciation of the claim and the payment of the money to the school district. The court of claims would then be asked to allow the school district to proceed with the improvement and the bonds would be cancelled.

Because of the lack of money modern school districts are burdened with the necessity of not possessing the funds to meet the needs of education.

The proposed plan would allow the school district to proceed with the school improvements needed to meet the educational needs of the children.

The proposition was submitted to the court of claims which granted permission to proceed with the improvements. The bonds were cancelled and the money was paid to the school district.

The school district was then able to proceed with the improvements needed to meet the educational needs of the children.

Michigan is not suffering from a shortage of dry weather, but many soybean growers, particularly those in the Clinton County soybean growing areas, are concerned about the lack of moisture. This is because the test is free and the state is underutilized by the MDA's Farm Bureau. The government has committed to planting 50 percent of available soybean fields, but only 15 percent are planted so far. The test is free and the state is underutilized by the MDA's Farm Bureau. **Farm Tips**

**QUALITY SEED AVAILABLE**

Soil growth is important for soybean fields. Farmers should plant soybean fields in a timely manner to ensure optimal growth. Soybean fields that are not planted by May 15 may not have enough time to develop before the end of the season. Farmers should ensure that their soil is well-fertilized and that their irrigation systems are in good working condition. Soybean fields should be fertilized with a balanced mix of nitrogen, phosphorus, and potassium. Farmers should plant soybean fields in a timely manner to ensure optimal growth. The Future Farmers of America give a thorough education in the
most recent farming techniques for the young men and women of
America's farming community. We salute the F.F.A. for an endless
effort to improve all the aspects of farming. In classroom instruc­
tion, in the field training and scientific research the F.F.A. has con­
quered many of the hazards that have slowed down farm produc­
tion in the past.

Middlebury

The United Methodist Women of the Middlebury United Methodist Church are the driving force of the church with Helen Morin, President, and Gail Clevenger as Co-Presidents. A cooperative effort was made to move to the present site at a cost of $8,000. Virgi lina L. Hunsicker, Pastor, enthusiastically supported the project. The end result is a magnificent building that is a credit to Middlebury and the Middlebury Methodist Church.
