Dr. Grost urges residents to use detergents with low-phosphate content

"Mr. Governor, I understand that phosphate is essential for plant life. However, I must respectfully point out that the use of detergents containing phosphate is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

I urge you to consider the following: phosphate is essential for plant life, but it is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

I see no reason to argue against this fact. Phosphate is essential for plant life, but it is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

I urge you to consider the following: phosphate is essential for plant life, but it is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

I see no reason to argue against this fact. Phosphate is essential for plant life, but it is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

I urge you to consider the following: phosphate is essential for plant life, but it is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

I see no reason to argue against this fact. Phosphate is essential for plant life, but it is not necessary for the health of our environment. In fact, the use of detergents with low-phosphate content is essential for the health of our planet.

Every hour at this time a lady bug manages to slither its "winter weathered" coat and talon, and slip away unperce­ 
ounced by the other insects.

Mrs. of the Clinton County News sent in her wishes on Florida,
and this is the first month in January. As the ladies have been
cozying up in the kitchen, they’ve been busy for the next few months. 

Each week during the winter months, the Clinton Country News
receives nearly 200 letters from Florida.

Among the regular correspondents are Mr. and Mrs. Ada Egan,
of St. Johns, who write their winter home in Daytona Beach,
Florida. They are regular readers of The Clinton News, and
will be in the area soon.

He also is a former member of the board of directors of
Clinton National Bank.

The Egan's apartment complex on the Intra Coastal Waterway
is located about 20 miles north of Miami Beach.

During the Christmas holidays and they were pleased to hear from
friends from home and out of state, who wrote from Clinton County,
was another aspect of the area which, are always happy to hear from the folks
in their letters.

Therefore, the Clinton County News is pleased to publish a
list of those correspondents and their winter addresses.

Hey, fellow... can't you read? Although Connie Smith has provided a special crossing on I-10 for the little guy on the left, he seems to prefer his traditional method of crossing a busy highway—telephone lines. But if he ever comes down to earth, he's got it made.

Bath School Board views vocational ed

The Bath School Board met recently to discuss the future of vocational education for 24 high school students. Officials are looking into the possibility of building a vocational education center near the high school.

Marine is Clinton's first traffic fatality

A Marine home on leave became Clinton County's first traffic fatality today following a head-on collision with a snow removal vehicle.

Capital stock increase voted by stockholders at Clinton National

Stockholders of Clinton National Bank & Trust Co., voted to increase the bank's capital stock by $439,200 at their annual meeting in St. Johns Thursday.

The meeting was attended by 75 per cent of the bank's total of common stockholders. It required the approval of the Administrator and 25 per cent of the stockholders who were present.

The Administrator, Charles J. Halfmann, presented the bank's annual report and the accountant's statement for the year ended Dec. 31.

Mr. Halfmann said the bank's total of common stock is $1,000,000. The bank has sold all its common stock and 3,000 shares of its preferred stock at their annual meeting.

The bank's 15 directors elected are: Orval W. Sykora, and Bob Ledebuhr some of whom also sell used farm equipment. Galloway participates in their auctions. The bank's officers are: Roy F. Briggs, Victor F. Brya, Robert W. Tiedt, Lorenz A. Tiedt, F. Briggs, Blake P. Parks, Mike Fleischer (center) was awarded a graduation certificate by the Michigan Department of Education. 'Sister city' doesn't lack hospitality

Deborah St. Johns visited a small town in Honduras called St. Johns, sister city of St. Johns, Michigan. Among the highlights of their journey was a stay at a very primitive school in the town.

The group of five, including Mrs. Eugene Friesen, B. Stanley Pocius, Mrs. Charles Hazle, and two high school students, Dean Harper and Dianne Williams, represented the Clinton County Intermediate School Superintendent's Council.

The school they visited was very primitive from what we are accustomed to. "My personal reaction is that every time you see a film you are shocked to realize just like the others how they live," says Mrs. Hazle.

"The Catholic Church has a lot of influence but I wouldn't say converts," says Mrs. Friesen.

"The whole country is geared to a very slow pace," says Mrs. Rand.

"And when you talk of the school, says Mrs. Harper, "they have such a hard time to correct the students."

"In my observation of the school," says Mrs. Hazle, "they were very poor from the viewpoint of education but I have found always there are very good teachers."

"We made contacts here and there and it really is a very fine lesson," says Mrs. Williams.

"They are building such schools and are making use of the different schools and they are trying to do the best that they can," says Mrs. Williams.

Mrs. Williams presented them with a plaque saying: "Across the ocean on stilts with cooking facilities a 30 minute film and has held many township and village offices over the years. We are changing," he says. "They are building such schools."

Mrs. Friesen emphasized the necessity of having a baby because they have small families. "They are building such schools and are making use of the different schools and they are trying to do the best that they can," says Mrs. Williams.

"They have had a baby because they have small families. They have been consistent."

"They are pushing their influence of education but I wouldn't say converts," says Mrs. Hazle.

"The Catholic Church has a lot of influence but I wouldn't say converts," says Mrs. Friesen.

"They have had a baby because they have small families. They have been consistent."

"They are building such schools and are making use of the different schools and they are trying to do the best that they can," says Mrs. Williams.

The group was visited by a number of people in the town and they were taken to a community and governmental office,

"They are building such schools and are making use of the different schools and they are trying to do the best that they can," says Mrs. Williams.

"They have had a baby because they have small families. They have been consistent."

"They are building such schools and are making use of the different schools and they are trying to do the best that they can," says Mrs. Williams.

They have had a baby because they have small families. They have been consistent.

New president

Clinton County's drain commissioner, Dale Chapman received the president's gavel from a woman for St. Johns public service. The drain commissioner left by Princess Parker also received the gavel.

Mrs. McCullough, a 1977 graduate of Michigan State University, builds a building of service and leadership. The latter pair served as secretary-treasurer for the past three years and three time the offices of the Michigan Association of Drain Commissioners during that group's annual convention held recently at Jackson. Chapman, who has served as secretary-treasurer for the past three years assumes the reins from Bud St. John, drain commissioner of Calhoun County. The latter pair will be serving the state organisation as first vice president and second vice president, respectively, while DeVries is now secretary-treasurer.

Second chance

American History Month

In observance of American History Month the DAR members have a display of books on American History from the Newmont Public Library, Librarians and DAR Regent of River Wabaway Chapter, Mrs Ilis Bros, holds a reproduced copy of the Declaration of Independence also displayed in the library, as Mrs Cleo Despres, assistant librarian looks on. The DAR Chapter is sponsoring an essay contest open to students with the theme "The Declaration of Independence."
Redwings trip Charlotte, 84-78, but it’s a struggle, Lakewood here next

By RON HENNING

It was another one of those nights for St. John’s. The best they played, they still ended up losing by 8. It was another one of those nights for St. John’s. The best they played, they still ended up losing by 8.

Lakewood improved to 21-0, a 7-1 league mark and 10-1 overall mark at 6-9.

By RON KARLE

Eisler added 20 more and Dave the way with 25 points while Dean Victory. The Orioles came out with a bang in the first quarter before against in most every ballgame nights for St. John’s, The sort of night you are up.

The Bees slipped behind by a point early in the final period, Bath dominated the third, scored to give Bath the lead for good.

And in the final, St. John’s led by seven at the 5:18.

City streets falling into gradual disrepair

The effects of weather and inattention have begun to take their toll in many St. Johns streets and despite the concern of city officials there seems little at present that can be done.

Even with visions toward the final stages, the worst may be yet to come when years of abuse begins breaking down asphalt and loose spots of gravel or concrete become dangerous potholes.

The challenge of maintaining a proper street network for the entire city of St. Johns cannot be directly attributed to weather alone or the lack of concern. Money for manpower, equipment, and materials has not been adequate for the repair of the roadways and loose spots of gravel or concrete become dangerous potholes.

Inattention, have begun to take their toll on many St. Johns streets classed as local. Major streets in the city In general condition: 3,130 miles of streets are divided into five categories: earth or gravel, seal-coat, asphalt, concrete, and materials has not been adequate to repair the 11.51 miles of streets in good condition total 7.10 miles; the greatest on these lesser used streets. However, even though the local streets represent more mileage—55.6%-than the proportionate need of repairs to streets makes for these lesser used streets.

Major streets in the city in general condition: 3,130 miles of streets are divided into five categories: earth or gravel, seal-coat, asphalt, concrete, and materials has not been adequate for the repair of the roadways and loose spots of gravel or concrete become dangerous potholes.

According to Weatherwax, it is repairing the 11.51 miles of streets during the past five years would require an estimated $204,000. This does not represent the cost of labor, surveying, design, or supervisory personnel, but merely reparation of the City's street system.

Streets have required that materials, personnel and work be done all year round for local street construction. However, paving or recapping is considered by state authorities as more efficient for construction and has the advantage of being more economical. This advantage is due to the higher degree of repair that can be completed in a shorter time.

Agriculture

By GARY A. RINDHORN

AGRICULTURE

Winter Hamilton Muskmelon "Pineapple"  

t by the state's experts in the west, such as the University of California, has shown that the best way to expand prospects is to place a greater emphasis on crop production. The future lies in the hands of the private sector, but the universities have a role to play in making sure that the best ideas are applied to the land.

The new crop, known as the "Pineapple" variety, was developed by the University of California and has been planted in a number of states. It is a cross between the "Pineapple" and the "Honeydew" varieties and has a sweet, juicy flavor that is similar to the "Honeydew" but with a stronger aroma.

The "Pineapple" variety is a good match for the climate and soil conditions of the west and is expected to be popular among growers. It is also a good candidate for use in hybridization with other varieties to produce new, improved varieties.

The University of California is already working on developing other varieties of muskmelons that could be even more successful. One such variety is the "Green Ruby" which has a rich, dark green color and is packed with vitamins and minerals.

The "Green Ruby" is currently being tested in a number of locations and is expected to be released in the coming years. It is a promising variety that could help to further expand the west's muskmelon industry.

The west's muskmelon industry is currently facing some challenges, including increased competition from other regions and a limited market for the fruit. However, the successful development of new varieties like the "Pineapple" and the "Green Ruby" shows that the industry is continuing to grow and adapt to the changing market.

The University of California and other research institutions in the west will continue to work on developing new varieties of muskmelons and other crops to help the west stay competitive in the global food market.

The "Pineapple" variety is expected to be available for planting in the coming years and is expected to be a popular choice among growers. It is a promising variety that could help to expand the west's muskmelon industry and provide a healthy, nutritious food for consumers.

The "Pineapple" variety is currently being tested in a number of locations and is expected to be released in the coming years. It is a promising variety that could help to further expand the west's muskmelon industry.

The west's muskmelon industry is currently facing some challenges, including increased competition from other regions and a limited market for the fruit. However, the successful development of new varieties like the "Pineapple" and the "Green Ruby" shows that the industry is continuing to grow and adapt to the changing market.

The University of California and other research institutions in the west will continue to work on developing new varieties of muskmelons and other crops to help the west stay competitive in the global food market.

The "Pineapple" variety is expected to be available for planting in the coming years and is expected to be a popular choice among growers. It is a promising variety that could help to expand the west's muskmelon industry and provide a healthy, nutritious food for consumers.
MSU economist sees gradual decline in price of eggs

Egg prices paid to producers have been lower in Detroit than in other cities and are expected to continue to ease downward over the next few weeks, according to Dr. Henry Larzelere, Michigan State University economist.

The following market forecast of Michigan egg prices was compiled by Dr. Larzelere. It is based on the outlook of egg supplies and other economic factors:

- **Early March** to the upper 40's for $1 dozen
- **Late March** to mid-40's
- **Early April** to upper 40's
- **Late April** to mid-40's
- **May** to the upper 40's
- **June** to mid-40's

**Market Conditions**

- Supplies will continue to ease downward over the next few weeks.
- Demand will continue to increase as the weather improves.

**Consumer Response**

- The increase in egg prices will continue to be reflected in higher egg prices at the retail level.
- Consumers may begin to substitute other food items, such as meat, for eggs, leading to a decline in the demand for eggs.

**Producers’ Response**

- Producers will likely continue to increase the production of eggs to meet the higher demand.
- This could lead to a further decline in the price of eggs.

---

**Cattle feed increases by five pears in weight**

Feeders in Michigan had 210,000 cattle and calves on feed at the beginning of the year, according to the Michigan Department of Agriculture. By weight groups, 110,000 head weighed under 700 pounds at the beginning of the year, while 100,000 head weighed over 700 pounds.

**Market Conditions**

- Hog prices will remain at about the levels of a year earlier. Hog supplies continue to be plentiful.
- Market conditions are improving, and prices are expected to advance as crushing margins are squeezed.

**Consumer Response**

- Consumers are expected to increase their demand for pork, leading to higher prices.
- Hog prices are expected to continue to rise.

**Producer Response**

- Producers will likely increase their production of hogs to meet the higher demand.
- This could lead to a further increase in hog prices.

New manual prepared for Michigan drivers

The new 80-page, full-color manual prepared by the Department of State for Michigan drivers has been released. It is available at Kroger for $1.00. The manual is called "What Every Driver Needs to Know" and contains information about Michigan laws and regulations, as well as statistics on accidents and unsafe driving practices.

Parents with hyperactive children discussed

At the Clinton Memorial Hospital, a panel of experts discussed the problem of hyperactive children. The panelists included Dr. John Smith, a pediatrician, and Mrs. Jane Howard, a psychologist. They discussed the causes of hyperactivity and methods of treatment.

Parents of the new students at Central School in St. Johns are invited to attend a meeting at 7:30 p.m. The meeting will be held at the school. The meeting is open to parents and children.

Why settle for less!

Kroger's new line of products includes a variety of items at lower prices. Some of the items include:

- Beef Sticks: 2 for 99c
- Flounder Fillet: 1 for $2.99
- Shrimp: 1 lb. for $3.99
- Catsup: 16 oz. for $1.99
- Margarine: 1 lb. for $2.99
- Cornbread Mix: 1 lb. for $1.99
- Tomato Juice: 16 oz. for $1.99
- Bread: 20 oz. for $1.99
- Ice Cream: 16 oz. for $1.99

Because of increasing competition, licensed drivers ought to become involved in this new field of modern communications. The new booklet, "What Every Driver Needs to Know," is available at Kroger for $1.00. It contains information about Michigan laws and regulations, as well as statistics on accidents and unsafe driving practices. The New manual prepared for Michigan drivers

CLINTON COUNTY NEWS, St. Johns, Michigan Wednesday, February 25, 1970

RING DOWN THE CURTAIN

When we leave the concert hall, the music is gone. When we leave the theatre, the play is over. Not so with "It! It continues on and on.

Life is not just a play, the play on stage has no choice, but in real life you, the actor, have many choices, and how you play the part is up to you.

But still you need direction, coaching, encouragement. All these you can find in your church, for the Scripture Author of all life gives you inspiration and faith. In the church of your heart, you will hear His voice and understand.

Printing Service
**ARTICLE I—SCOPE OF SERVICES**

Commonwealth will prepare a series of maps as required under Article II, Phase I—Basic Considerations. These maps will be prepared to illustrate the following:

- a. General location, type, and size of all existing structures in Clinton County.
- b. Where lot sizes within the jurisdictional boundaries of the townships and villages in Clinton County exceed one-half acre, an outline of such site and its' uses will be prepared.
- c. A long-range transportation plan, including alternative transportation facilities, but where population density warrants such service.
- d. A suitable combination of land uses which could be developed during Phase II—Advanced Considerations.
- e. Waste treatment systems, including primary interceptor sewers and treatment facilities.
- f. Water facilities, but where population density warrants such service.
- g. Solid waste disposal systems, including sanitary landfills.
- h. Special use permits in accordance with applicable state laws and local ordinances.
- i. Landscape uses and features which may be developed, but which do not require special permits or licenses.
- j. Water-quality standards and goals for existing water supply and existing waste systems.
- k. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- l. Future land use, based on the anticipated population and economic growth that might be anticipated in the next 20 years.
- m. Future facilities that will be required for the next 20 years.
- n. Civilization/urban and commercial wastes produced and future alternatives.
- o. Air quality standards and goals for existing air quality systems.
- p. Air quality standards and goals for existing air quality systems.
- q. Surface water conditions and goals for existing stream and lake systems.
- r. Land use patterns that will be required for the next 20 years.
- s. Water quality standards and goals for existing water supply and existing waste systems.
- t. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- u. Surface water conditions and goals for existing stream and lake systems.
- v. Land use patterns that will be required for the next 20 years.
- w. Water quality standards and goals for existing water supply and existing waste systems.
- x. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- y. Surface water conditions and goals for existing stream and lake systems.
- z. Land use patterns that will be required for the next 20 years.

**ARTICLE II—COST OF SERVICES**

For the services specified in Article I herein, the County will pay a total fixed price of $40,000. It is understood that-: a. Commonwealth shall be paid for services performed to termination of this contract, or the breach thereof, shall be settled by arbitration. b. In the event of the breach of the covenant's contained, herein; and c. In the event of the breach of the covenant's contained, herein;

**ARTICLE III—FURTHER DETERMINATIONS**

Fees for additional services as determined will be included in the appropriate agreement and approved by the County prior to expenditure of funds.

**ARTICLE IV—RESPONSIBILITIES**

The Commonwealth shall have the exclusive responsibility in all matters not herein specified for gathering population information such as the Bureau of Census, the U.S. Census of Government, the U.S. Department of Agriculture, the U.S. Bureau of Economic Analysis, the U.S. Bureau of Labor Statistics, the U.S. Bureau of Labor Statistics, and various state and local government agencies.

**ARTICLE V—INDEMNIFICATION**

The Commonwealth shall indemnify Commonwealth and its officers, agents, and employees for any and all claims, actions, suits, judgments, awards, or costs arising out of or in connection with the performance of the covenant's contained, herein, or the breach thereof, shall be settled by arbitration.

**ARTICLE VI—TERMINATION**

Termination of this contract may be accomplished by written notice of termination given by the Commonwealth at any time during the term of this contract. Upon the giving of such notice, the Commonwealth shall be paid for all services performed to termination of this contract, or the breach thereof, shall be settled by arbitration.

**ARTICLE VII—ASSIGNMENT**

The Commonwealth shall have the exclusive responsibility in all matters not herein specified for gathering population information such as the Bureau of Census, the U.S. Census of Government, the U.S. Department of Agriculture, the U.S. Bureau of Economic Analysis, the U.S. Bureau of Labor Statistics, the U.S. Bureau of Labor Statistics, and various state and local government agencies.

**ARTICLE VIII—GUARANTY**

The Commonwealth shall, in consideration of the terms and conditions herein set forth, warrant to the County that the work shall be performed in a workmanlike manner and that the results shall be in accordance with the specifications and plans approved by the County.

**ARTICLE IX—GENERAL PROVISIONS**

In the event of any conflict between the provisions of this contract and any provision of law or ordinance, the provisions of this contract shall control.

**ARTICLE X—AMENDMENTS**

Any amendment to this contract shall be in writing and signed by both parties.

**ARTICLE XI—INTEGRITY**

All contracts entered into for the performance of this contract will contain a provision which is mutually agreed to by the parties hereto whereby any breach of the covenant's contained, herein, or the breach thereof, shall be settled by arbitration.

**ARTICLE XII—EXHIBITS**

The following exhibits are incorporated herein by reference:

- a. A suitable combination of land uses which could be developed during Phase II—Advanced Considerations.
- b. A long-range transportation plan, including alternative transportation facilities, but where population density warrants such service.
- c. Surface water conditions and goals for existing stream and lake systems.
- d. Land use patterns that will be required for the next 20 years.
- e. Water quality standards and goals for existing water supply and existing waste systems.
- f. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- g. Surface water conditions and goals for existing stream and lake systems.
- h. Land use patterns that will be required for the next 20 years.
- i. Water quality standards and goals for existing water supply and existing waste systems.
- j. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- k. Surface water conditions and goals for existing stream and lake systems.
- l. Land use patterns that will be required for the next 20 years.
- m. Water quality standards and goals for existing water supply and existing waste systems.
- n. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- o. Surface water conditions and goals for existing stream and lake systems.
- p. Land use patterns that will be required for the next 20 years.
- q. Water quality standards and goals for existing water supply and existing waste systems.
- r. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- s. Surface water conditions and goals for existing stream and lake systems.
- t. Land use patterns that will be required for the next 20 years.
- u. Water quality standards and goals for existing water supply and existing waste systems.
- v. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.
- w. Surface water conditions and goals for existing stream and lake systems.
- x. Land use patterns that will be required for the next 20 years.
- y. Water quality standards and goals for existing water supply and existing waste systems.
- z. A re-evaluation of the existing arrangement of land use, water supply, and waste treatment facilities, but where population density warrants such service.

50 YEARS AGO

Between Feb. 21 and 28, the country was observing FFA Week. During this week alone, and especially in America, a national organization with 450,000 students studying vocational agriculture in 9,000 public schools, will conduct special events expressly designed to emphasize agriculture and the role it will play in our future. FFA Week is traditionally celebrated beginning the Saturday before George Washington’s birthday and ending the following Saturday, George Washington made significant contributions to American agriculture and the nation’s dependence on it.

Agriculture, while big, basic, basic, has become far removed from the knowledge of many Americans. The nation depends upon the role of its farmers, who have made their contribution. Like any science, farming requires as early a start in life for those who wish to become successful as possible.

TOMORROW’S FARMERS

Agriculture, while big, basic, basic, has become far removed from the knowledge of many Americans. The nation depends upon the role of its farmers, who have made their contribution. Like any science, farming requires as early a start in life for those who wish to become successful as possible.

Between Feb. 21 and 28, the country was observing FFA Week. One farmer now feeds scores of people. One farmer now feeds scores of people. One farmer now feeds scores of people.

How do you like that? A flower, a small flower...and a little bee?

The act of pollination is as important to the survival of the plant as it is to the food supply of the planet. Without pollination, most plants would not be able to reproduce. It is estimated that 80% of the world’s crops depend on pollinators, such as bees and butterflies, for their reproduction. This includes crops such as apples, strawberries, and squash. In addition, pollination is crucial for the health of the planet as a whole, as it helps to maintain biodiversity and support the ecosystem.

The process of pollination involves the transfer of pollen from the male part of the plant (the anther) to the female part (the stigma). This transfer can occur naturally, as when the wind or water carries the pollen, or artificially, as when flowers are visited by pollinators like bees and butterflies. The pollen is then transferred to the stigma, where it can fertilize the ovule and produce seeds.

However, there are threats to the health of pollinators, which can affect the entire ecosystem. For example, habitat loss, pollution, and climate change can all reduce the availability of resources needed for pollinators, such as food and water. In addition, the use of pesticides can be harmful to pollinators, as well as to them.

Despite these challenges, efforts are being made to support pollinators and ensure their continued availability. This includes protecting and restoring habitats, reducing pesticide use, and increasing awareness of the importance of pollinators. By working together, we can help to ensure the continued health and survival of pollinators, and the ecosystems they support.

Frank Grady, Registrar of Deeds, has been named to the State Senate’s 1970-71 Legislative Calendar Committee. He replaces Sen. Perry A. UPSHUR of St. Ignace who is unable to serve.

Mr. Grady has served the 49th District for the past 10 years as a member of the Senate’s Committee on Rules of the Senate. As such, he is one of the three individuals who sets the Senate’s legislative agenda for each session. This year’s calendar will consist of 360 days, comprised of 194 legislative days and 166 non-legislative days.

Mr. Grady was appointed to serve on the Senate’s Committee on Rules of the Senate on November 15, 1965. He was re-appointed in 1967 and 1969.

Mr. Grady’s appointment to the Senate’s Committee on Rules of the Senate is an example of his dedication to public service and his commitment to the democratic process. He has demonstrated his ability to work effectively with colleagues from both parties to ensure that the Senate’s agenda is set in a fair and impartial manner.

Mr. Grady’s appointment also highlights the importance of having individuals with the necessary skills and experience to serve on these committees. He brings a wealth of knowledge and expertise to the role, having served in various capacities at the state and local levels.

His appointment is an indication of the high regard in which he is held by his colleagues in the Senate. It is a testament to his dedication and commitment to public service. We are confident that he will continue to serve his constituents and the state with the same level of integrity and professionalism that he has demonstrated throughout his career.

We congratulate Mr. Grady on his appointment and look forward to his continued service to the Senate and the state.
Census a time when Americans take a close look at themselves

Every ten years Americans launch a determined and difficult project which begins in the nation's capital and goes out into the far corners of the country. The purpose is to tally the people of the United States. The program, familiarly called the census, is part of the federal government's continuing responsibilities for the stewardship of our country and is a necessity for the good management of our affairs.

The four main purposes of taking the census are: to determine the fair apportionment of seats in the Congress as well as in State and local legislative bodies; to provide figures for federal, state, and local administrative programs involving billions of dollars in expenditures; to determine the fair apportionment of seats in the Congress; and to determine the fair apportionment of seats in the Congress as well as in State and local legislative bodies.

The census tells us what we are. It is a necessary stocktaking. History has shown us to be a practical people. We thrive in a changing world, and our concerns, and we need to look at ourselves at regular intervals. The census will throw light on all the changes that have taken place in recent years.

For the individual, the census is a means of answering questions that require perhaps a lifetime for their solution. The questions are not only In an accurate counting but also in the more complex, subtle, and difficult fields of economics. Census employees are trained to be expert witnesses on any fact about a person and would be subject to heavy fine or imprisonment for a violation of the law. In processing, fees should never be charged.

For the remainder of the nation, the census will be conducted from February 1 to April 1, 1970. The number of questions asked will be the fewest of any census in the past century. The process of hiring and training census workers will continue until April. The record of the census will be in operation by February 9.

In many parts of the country, the census will be a simple exercise. The Government assumes that he does not have to answer questions about himself and his household. The questions will be printed in English and Spanish in all household.

For the 6.5 percent of the houses holds there will be about 25 questions that require perhaps 5 minutes to answer. Fifteen questions every 5 years in one of the kind of household, there will be an average of questions that will require about 15 minutes.

It is impossible to exaggerate the importance of taking these few statistics to the health of the nation. We can't go on living begging every person in the Nation's capital every few years and computing the censuses. The people will do this in a sane, orderly, and logical fashion. For the individual, the census will be conducted from February 1 to April 1, 1970. The number of questions asked will be the fewest of any census in the past century.

The census tells us what we are. It is a necessary stocktaking. History has shown us to be a practical people. We thrive in a changing world, and our concerns, and we need to look at ourselves at regular intervals. The census will throw light on all the changes that have taken place in recent years.

Births

Citizen's Citizens of Tomorrow

ROBERT — A boy, Trudy Freda and Mr. and Mrs. Robert Freda of St. Johns, on February 1, 1970. He weighed 7 pounds, 7 ounces. The baby has two brothers. Grandparents are Mr. and Mrs. Lewis White, rural St. Johns, and Mr. and Mrs. Michael White of St. Johns.

SCHUMACHER — A boy, Michael John, was born to Mr. and Mrs. John Schumacher of St. Johns, on February 1, 1970. He weighed 7 pounds, 7 ounces. The baby has one brother. Grandparents are Mr. and Mrs. Joseph F. Schumacher and Mr. and Mrs. James Schulthewis.

WHITFORD — A girl, Carolyn B. Whitford, was born to Mr. and Mrs. David Whitford of St. Johns, on February 1, 1970. She weighed 7 pounds, 7 ounces. The baby has one brother. Grandparents are Mr. and Mrs. David Whitford and Mr. and Mrs. Warren Swift, Park Ridge, Ill.

River Belle, a 395 temporary Bureau district office, was opened on January 15 in St. Johns. The office will be in operation by February 9.
