High winds take toll

ST. JOHN'S City Com missioners called a special meeting for Wednesday, June 21, in an attempt to finalize plans for the long awaited memorial for operation of the city.

A proposed charter meeting just the commissioners and about a dozen people who are interested in the proposal was held July 1, but not one of the 24 people who were present showed up at the meeting when the charter was ready for adoption.

The commissioners agreed Tuesday night that it would not be possible to operate the city in a four-man board of the present charter provided approval is reached.

BULLETIN

The St. Johns City Com missioners called a special meeting for Wednesday, June 21, in an attempt to finalize plans for the long awaited memorial for operation of the city.

A proposed charter meeting just the commissioners and about a dozen people who are interested in the proposal was held July 1, but not one of the 24 people who were present showed up at the meeting when the charter was ready for adoption.

The commissioners agreed Tuesday night that it would not be possible to operate the city in a four-man board of the present charter provided approval is reached.

Well rejuvenation last step in city water program

Work continues on St. Johns $1 million plus water improvement program, which has been under way for the last three years. The project, which began in 1964, is nearing completion and will provide a modern, efficient water system for the city.

The program includes the construction of a new water treatment plant, the installation of new water mains, the rehabilitation of existing water mains, and the rehabilitation of the city's water distribution system.

The new water treatment plant, which is located on the east side of the city, will have a capacity of 1,200 gallons per minute. The plant will be equipped with the latest in water treatment technology, and will be able to meet the needs of the city for many years to come.

The new water mains, which will be installed in the city's water distribution system, will be made of high-quality materials and will be designed to last for many years. The existing water mains will be rehabilitated to ensure the safety and reliability of the city's water distribution system.

The rehabilitation of the city's water distribution system will include the replacement of old and deteriorated water mains, the rehabilitation of water mains that are damaged or leaking, and the installation of new water mains in areas where the existing water mains are not adequate.

The water treatment plant, which is now under construction, will be completed later this year. The new water mains, which are being installed, will be completed in the fall of this year. The rehabilitation of the city's water distribution system will be completed in the spring of next year.

The city's water system will be improved to meet the needs of the city for many years to come. The new water treatment plant, new water mains, and rehabilitation of the city's water distribution system will provide a modern, efficient water system for the city.

The city's water system will provide water to all residents of the city, and will be available to all businesses and industries in the city.

The city's water system will be operated and maintained by a professional water utility, and will be monitored by a team of experienced water utility professionals.

The city's water system will be designed to meet the needs of the city for many years to come. The new water treatment plant, new water mains, and rehabilitation of the city's water distribution system will provide a modern, efficient water system for the city.

The city's water system will be improved to meet the needs of the city for many years to come. The new water treatment plant, new water mains, and rehabilitation of the city's water distribution system will provide a modern, efficient water system for the city.

Bombardments That

The st. Johns News-Press
published an article about
the damage. The Clinton County News
published an article about
the clean-up.

The City of St. Johns

The newspaper article reported that
water had blown down across
the roof.

MOLNAR, 29, of Adaranintoatree
11 p.m. a car driven by Frank
M-21 west of DeWitt Road.

Fonmen reported the
the roof has been damaged
between 80 and 90 cents a quart
buying about other prices.

Pflugsten contended. Coca-Cola in six-
and share. Grownups were paying be-
drinking a little more than twice as
much soda pop as they did milk.

The problem there arises from
the number of houses and stores were
between their $1 per hundredweight in-
crease, he said. "The only thing
signing."

By NANCY E. GUIRAN

S. J. School

The Symphonic Wind Ensemble was a sample three day festival at Michigan State University sponsored by the Michigan Music Educators Association. The program included the following: The Festival Band, the Wind Ensemble, the University Wind Band, the Wind Ensemble Band, the Wind Ensemble Orchestra, the Wind Ensemble Choir, the Wind Ensemble Orchestra, and the Wind Ensemble Choir. The Wind Ensemble Band was conducted by Dr. George C. H. Clark, and the Wind Ensemble Choir was conducted by Dr. Harry B. B. Clark.

THE GIRARD PERREGAUX

HIGH-FREQUENCY CHRONOMETER

—MOST PRECISE IN THE WORLD

The Girard-Perregaux high-frequency chronometer represents one of the greatest achievements in the advancement of the classic mechanical watch. The beats of the balance-wheel/hairspring system have been increased to 36,000 per hour (twice that of ordinary balance-wheels/hairsprings). This increase in the frequency of the balance-wheel/hairspring system has allowed for a more accurate and precise timekeeping. The Girard-Perregaux chronometer is a masterpiece of precision engineering, combining the highest levels of craftsmanship and technology.

90 YEARS YOUNG

Mrs E. H. Fitzpatrick of 501 Vavour St, St. Johns is 90 years young. She reached that milestone last Thursday. Mrs. Fitzpatrick was born April 13, 1877, at Vermillion. She has seven living children and a total of 68 direct descendants, including children, grandchildren and great-grandchildren. Her children are Mrs. Living Eaton and Gladys Fitzgerald of St. John's; and Doyle Fitzpatrick of Lansing. Mrs. Fitzpatrick's parents were S. B. and Carry M. Jones of and Clinton Fitzgerald of Calumet.

Mackinac Island lilac time near

This week the Annual Lilac Festival in Mackinaw City will mark Mackinac Island as a flower island. Thousands upon thousands of lilacs have been planted, and species of lilacs have been displayed their articulate talents in outdoor concerts, and the lilac celebration is the crowning of a lilac species. Since that time, the island will visit Mackinac Island.

Registration open for summer camp

Local school districts are preparing to open for summer camp. The week was highlighted by a lilac tour of the island, and the lilac celebration is the crowning of a lilac species. Since that time, the island was claimed by governors and celebrated.

Grogne Week being celebrated

Grogne Week, pro- duced by laboratories and marketing experts, will be the last week of the school year. The Grognes are part of a cohort that includes such "standard" institutions as Fort St. John, Port Angeles, and Fort Myer.

CITIES TO DISCUSS PENDING COURT CHANGES

Grogne Week will be a celebration of the lilac species. Since that time, the island was claimed by governors and celebrated.

FABRIC SELECTION CLASS SET

Robert L. Wirth of St. John's University is the first to receive the fabric selection class set. The fabric selection class set is called "Fun with Fabrics" and will include valuable information on the selection and care of garments and fabrics.

Robert L. Wirth of St. John's University is the first to receive the fabric selection class set. The fabric selection class set is called "Fun with Fabrics" and will include valuable information on the selection and care of garments and fabrics.

ROBERT L. WIRTH OF ST. JOHN'S UNIVERSITY IS THE FIRST TO RECEIVE THE FABRIC SELECTION CLASS SET. THE FABRIC SELECTION CLASS SET IS CALLED "FUN WITH FABRICS" AND WILL INCLUDE VALUABLE INFORMATION ON THE SELECTION AND CARE OF GARMENTS AND FABRICS.

Touring Bishop’s Company drama at church here April 26

"...The senior's depleted treasury after the major part of it was taken during the school robbery have conducted other money—

"...The profits will go to build up their money be spent for children's charities, and they requested that..."

"...The appointment was made at the regular board meeting which was held last Tuesday, April 10."

"...the establishment of five separate groups one from each of the township's villages..."

"...each of the five groups..."
Keeping bridges apace with roads knotty job

Clinton spending goes for both

BY SANDY RATHBUN

Of what once was a well-paved road it goes or never fades. In the old days it was a beautiful scene. As the years went by, however, the road began to deteriorate. Now, with the advent of new technology and materials, the road is being restored to its former glory.

Dairy Auction

The Dairy Auction is a popular event in our community. It takes place every Thursday at the Clinton County Fairgrounds. This year, the auction will feature a variety of dairy products, including milk, cheese, and butter. The auction is open to the public and provides a great opportunity for farmers to sell their products.

Pratts Road Crossing Bad Creek

The Pratts Road Crossing Bad Creek project is an important initiative for the Clinton County Road Commission. The project involves the construction of a new bridge over Bad Creek to improve the flow of traffic and reduce the risk of flooding. The project is expected to be completed in the near future.

Tallman Road Crossing Maple River

The Tallman Road Crossing Maple River project is another important initiative for the Clinton County Road Commission. The project involves the construction of a new bridge over Maple River to improve the flow of traffic and reduce the risk of flooding. The project is expected to be completed in the near future.

Wood on Cement Demands Good Care

When working with wood on cement, it is important to ensure that the wood is properly treated to prevent damage. One way to do this is by applying a waterproofing sealant to the wood before it is placed on the cement. This will help to prevent water from seeping into the wood and causing damage.

Gunnisonville

Marcel B. Elliot, new pastor at Gunnisonville

Mr. and Mrs. Elliot attended the opening of the new church in Gunnisonville. The service included music by the church choir and a dedication ceremony. The church was filled with people who were eager to attend the service.

Gunnisonville Church

The Gunnisonville Church is located on the corner of Main Street and Church Street. The church was built in 1863 and is one of the oldest churches in the area. It is known for its beautiful architecture and its rich history.

Forest Hill Road (Before)

West Hubbardton

By Clark Regen

The annual meeting of the Hubbardton Community Church was held in the homes of Mr. and Mrs. Hubbardton. The congregation discussed the budget and the financial status of the church.

North Victor

By Mrs. Ethyl Kelleby

The annual meeting of the Victor Community Church was held in the homes of Mr. and Mrs. Kelleby. The congregation discussed the budget and the financial status of the church.

Ad

Forest Hill Road (After)

By Revel Elliott

The first service of the new church in Forest Hill was held on Sunday morning. The service included music by the church choir and a dedication ceremony. The church was filled with people who were eager to attend the service.

Rev. Elliott did his undergraduate work at Michigan State University, and was graduated in 1955. He was married to Mrs. Elliott in 1957.

DAIRY AUCTION

Dairy Auction

Discontinuing dairy, we will sell the following list of public auction, including 2 miles north of Detroit, via Kline road and 3 mile east at 2760 Blivett Rd., close to the edge of a river? On the other side of the road is an old well-paved road which suffers from recurring shortages. According to the results are as follows: president, Arthur Curtis; first vice president, Eugean Montague; second vice president, Philip Sheaffer.

The average cost of building smooth roads, as the major problem then was not the need for better and smoother roads became apparent. Instead, set off your panels with lumber over colored, richly patterned hardwood, such as those in the same type of wood for wall paneling. If you like furniture in deep masonry walls, such as those in a commercial toxic water re-
CLINTONTON NATIONAL GIVES $500 FOR LIBRARY

CLINTON National Bank & Trust Co. has made a contribution of $500 towards the erection of a new library to serve the Elise area. Stanley L. Loomis, manager of Clinton National’s Elise office, presented the bank’s check to Mrs Mollie Weasley, two- 

Cable to the Elise Public Library Building Fund.

Eagle

MR. BUSINESSMAN!...

This Year Add Clinton County's GREATEST SALESMAN to Your Sales Force:

Winner of the top award "General Excellence" for 1966, presented by the Michigan Press Association

NO OTHER MEDIA REACHES AS MANY CLINTON COUNTY RESIDENTS!
8,000 homes in Clinton County! . . . . and that's all subscriptions.*

THE CLINTON COUNTY NEWS IS RESPECTED!

People respect and invite the Clinton County News into their homes by paying for it. Wouldn't you rather spend your advertising budget with this kind of media?

THE ACID TEST:

More Clinton County businessmen spend more of their advertising dollars with the Clinton County News than any other single media! Why? Because they get more results for their dollars!

More national firms spend more money with the Clinton County News! Why? Because they consider it their best buy!

*Subscription should not be confused with distribution which is merely mailing without regard to whether the mailing piece is welcome or to be read by the receiver. Subscription is your assurance that the newspaper is wanted and read! People won't pay for something they don't want or feel they don't need!

BAD NEWS FOR VIRGINIA WOOLF?
SPECIAL BUILDERS' SECTION

featuring

New Home Tips
* Planning a new home? Then don’t miss the valuable advice on floor plans, plumbing, heating and electrical considerations, insulating, lighting, exterior siding and finishes, and windows.

Remodeling Ideas
* Mapping out a remodeling program? There’s plenty of good advice for you too. Articles discuss modern lighting, space-saving built-ins and improved room arrangements.

Landscape Planning
* If you’ve a green thumb, you’ll be interested in how to use various plants and trees for landscaping, flower and shrub color schemes, planning a garden, and even how to grow fruit trees for your family.

How to Finance
* No matter what type of project you’re planning, financing will be important. You’ll find information in financial approaches to every project. Insurance needs also are considered.

Progress Report
* What have your friends in Clinton County been doing the past year? Once again, we present a progress report on area building, with a variety of pictures from all sections.

Where to Buy
* Whatever you’re planning this year, you’re sure to find a source for the supply or service in this week’s Clinton County News. Scores of firms invite your attention.
Roots In Piping

Can Be Problem

Big, healthy trees are nice to look at, but it's possible that when they root near the house foundation, you'll get a surprise. Tree roots can invade underground waste piping around the home. But if you are careful, you can keep a check on underground piping and prevent damage. Meticulous planning and maintenance may save you a lot of money, too.

If you are planning to build or remodel your home this year, be sure to get an experienced contractor to do your wiring. Your electrical system is one of the most important things you have in your home. We suggest that you visit your contractor to see how he can help you.

Whatever Your Wiring Problems - Call Us

Those wonderful work-saving appliances often require extra outlets, sometimes even a new heavy-duty circuit. Whatever the job, our electricians will do the work methodically, cost equally. If you repeat it frequently, it is a sure sign of broken glass or - we will not put the trouble to fit it - fast.

Spring is Home Improvement Time

In the Spring a homeowner's fancy turns to thoughts of making that home a better place in which to live!

If YOU Have a House...

Ask Yourself These Questions

Does your home need a new heating system? Do your walls or doors let in cold air? Are there any major or minor plumbing repairs that need fixing? Maybe a "new look" in the kitchen or bathroom would help improve the looks of your house.

Are you always running out of hot water right at the crucial moment? Why not look at your house over... check its needs... then drop around to see us.

Saving Rain

To save water: (1) Plant the ground near the area of the house, which has the most lawn and grass. (2) Do not let water run into the ground. (3) Water in between rain showers. (4) Water in the early morning. (5) Do not water dry soil, but follow the rule of watering in small amounts. (6) Do not water the plants near the top of the plant, but water the base of the plant, or you will cause the plant to wilt. (7) Do not water the plants near the top of the plant, but water the base of the plant, or you will cause the plant to wilt. (8) Do not water the plants near the top of the plant, but water the base of the plant, or you will cause the plant to wilt. (9) Do not water the plants near the top of the plant, but water the base of the plant, or you will cause the plant to wilt.
‘Repair, Renovate, Remodel, Expand!’ Is Home Goal

KITCHENS ARE HOMEOWNERS’ PRIME TARGETS FOR IMPROVEMENTS through remodeling, a recent survey shows. The kitchen, as shown here, is a model of efficiency featuring an island arrangement for the clean-up center, an open, airy look with touches of cheerful color and lots of storage space provided by steel cabinetry that combines utility with beauty. Pots and pans are uniquely available via overhead rack.

Rancho Aided By Millwork

Can a modern house be transformed to a rich, handsome traditional? Yes, and it’s easier than you may think.

Furnishings obviously will be one key to the transformation. The other key and perhaps the more important key is alteration of the shell of each room—walls, ceiling, floor. Look at any good traditional and you’ll realize what’s missing in the modern ranch—architectural millwork. Crown moldings, baseboards, detailing around fireplace and cabinets, raised panel doors—rarely are these found in the usual rancho.

Happily, these moldings are readily available at any retail lumber yard, and their price will please the budget-minded.

Installation is not much of a trick, and finish can be paint, satin-finish clear varnish, or natural wood stain. Wainscoting, another traditional detail, can be added at the same time as moldings. Be sure to match lumber species if the finish is to be clear.

Backyard Pools Add Family Fun

If the memory of summer weekends stirs up, fighting crowds at the beach or the nearest beach, you can still provide your family with the benefits and relaxation that can be made enjoyable at home. To draw them to the pool, you can sell them a slip in your own pool.

To get the most out of your backyard pool, take advantage of the services offered by Martin Schafer & Sons. Your pool can be installed at no deposit and no finance charges, or you can take advantage of our one-year service plan. The services include:

- EASY TO INSTALL
- HIGH COMPRESSIVE
- HIGH INSULATION VALUE
- BEAUTIFUL TEXTURE
- FIREPROOF

Your pool can have an automatic filter, or a clean-out port which can be cleaned out for less than $100.00. Other options include:

- ADDITIONAL COVER
- AERIAL HEATER

You can have your pool in as little time as six weeks. Choose from the many different types of lining, such as red and blue, or the more modern white plastic.

For your backyard pool, contact Martin Schafer & Sons today.

Stark Stairway Needs Paneling

The open stairway need not be a liability in any basement. It can be the starting point to décor dressing in a major presentable area.

One method is to enclose it by creating a rail-which provides a pleasing high wall on the back side of the stairs. By using a carpet border banding, this can be made into a neat decorative feature. A decorative screen built of matched lumber may possibly be applied to the back side of the stairs. By in-celling high enclosure on the stairway, one can make into a neat storage facility.

• 15 squares of a ribbon course
• One or two horizontal lines are applied in the same color or in the same color, but of a slightly less emphatic hue
• A fourth course may be varied. The ribbon course may be every fifth or each course may be alternated. A "designed roof" takes advantage of the wide choice of colors.
• The design possibilities of this versatile material are often overlooked. An important step toward making the roof truly functional is the choice of the starter strip. The choice of "designed roof" takes advantage of the wide choice of colors.
• Alternating courses of different colors will give a roof a striped effect,
• The use of the black starter strip on a white or light color roof will be only ten to fifteen dollars for extra labor.
• One of the ways homeowners can achieve individuality for their homes is to give special attention to the roof. The roof is the largest exterior surface of a home, and it is often taken for granted in the development of the structure's esthetics.
• Make a start by encircling all areas of a "designed roof."
• Colors of different shingles are applied in the usual way, except that a given color is used for the extra course, the additional cost for this approach may involve no extra cost for materials, but extra labor may be slightly required.
• The use of the black starter strip on a white or light color roof will be only ten to fifteen dollars for extra labor. This approach may involve no extra cost for materials, but extra labor may be slightly required.
• One method is to enclose it to railing height, which provides a pleasing high wall on the back side of the stairs. By in-celling high enclosure on the stairway, one can make into a neat storage facility.

“Don’t Do-It-Yourself” Is Sound Advice For Some

The Do-It-Yourself requirement of home, and prescriptive inability to plan, is spelling so many of the seemingly important home improvements along, they are proportional away from the key. It is estimated, twenty billion dol­lar worth of effort to this time—when the development was just not as in the Deal improvements alone. But there are many projects which could be easily done in these times. One of the more interesting times is the time of the Do-It-Yourselfer, William St. Wacker, president of Piqua National Bank, Inc., nationwide loose improvement services at present.

In addition to installing cabling and sitting, ask where your friends and neighbors can do the work. There is no question that the work should be done only by a professional. As a general rule, home­owners, with certain tempera­tures of weather, undertake to do the work. There is no question that the work should be done only by a professional.

Ceiling Magic

Brighten up a bedroom with small ceiling tiles. A simple, low-cost way to give a more spacious look to any room is the safety of its step­proof finish. A number of combinations possible, and can be one-mixed with existing wall finishes. This quality is certified by the U.S. Department of Commerce.

Sunken Tubs Are Practical. Are Bath Beauty Additions

A sunken tub or “plunge” is the practical answer for the homeowner who wants a different look to the bathroom. A sunken tub is a type of plunge, where a self-draining, self-sealing feature is used. A plunge is the safety of its step­proof finish. A number of combinations possible, and can be one-mixed with existing wall finishes. This quality is certified by the U.S. Department of Commerce.

Better Business Bureau warns of machine scheme

A prolonged telephone solicitation scheme has been identified by Better Business Bureau in Michigan during the past few years. Telephone solicitors by the name of "United All States" and "South Dakota Deluxe" were found to have real telephone numbers which promoted a "second chance" play on a machine scheme to make it worthwhile for smaller sums which produce a "fake" number. The most recent twist of the scheme is that the victims, after "winning" the "second chance," are told they were actually "second place" winners for some other product. For example, those who signed up for five dollars received a "second place" award for a "Brownie Camera," and those who signed up for ten dollars received a "second place" award for a "Toaster." The letter sent to the "second place" winners included a stamped envelope to be returned for a "second chance," and these letters were often returned.

"Lucky Tab" reader for large prize.

AR mm 51 number of those who entered the contest are "second place" winners for kitchen and bathroom remodeling, it's right down our line!

Plantings Transform Home

Front View Is Starting Point For Landscaping

What does your home look like to your neighbors? To passersby on the street? To children playing in the yard? What you see outside your windows is important, for it is your "front entrance" to your house.

When you step out the front door, is it a pleasant walk, bordered by plants, trees, and flowers? Or a step through a narrow passageway, with nothing to set the tone for the rest of the house. This prevents the house from being dwarfed or obscured by large trees.

Smaller trees such as dogwoods and crabapples may be planted inside such lines, close to the house. This prevents the house from being dwarfed or obscured by large trees.

In some areas, a homeowner may have a bluish cast; it is not difficult to land­scape the entrance to a home, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them. This will have a lawn facing the street, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them. This will provide the homeowner with a view of the street or your front yard, which is a pleasing sight. It is not difficult to landscape the entrance to a home, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them. This will have a lawn facing the street, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them.

In some cases, a homeowner may have a bluish cast; it is not difficult to landscape the entrance to a home, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them. This will have a lawn facing the street, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them.

Foliages likewise should provide contrast. Taxus, or yew, is the deepest green of all conifers; it is recommended by the American Association of Nurserymen for providing the homeowner with a view of the street or your front yard, which is a pleasing sight. It is not difficult to landscape the entrance to a home, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them. This will have a lawn facing the street, with taller shrubs at the front door and smaller ones along the sidewalk and a low hedge behind them.

Tornado months are April, May and June

April, May and June are months when tornadoes are most likely to occur across the United States. These months have the highest number of tornadoes due to the increase in thunderstorm activity. The tornado season starts in March and peaks in May and June, when the atmosphere is most conducive to the development of strong, destructive storms. It is important to be prepared for severe weather during these months, as tornadoes can cause significant damage and casualties.

STAN COWAN MERCURY, Inc.
506 N. Clinton
ST. JOHNS
ent: Superintendent Lancaster, p.m. The minutes of the regular order by President Parr of March 8 and the meeting of April 5, 1967, in the office of Superintendent Lancaster.

Members present: Parr, Meyer, Henry Enochs, Waggoner, Bast, Richards, Livingston, Donough, Treasurer Kraft and Selling.

The minutes of the March meeting were read and approved.

The Clerk read a letter that was sent by Mr. Carter to Brown Bros., relative to their fill on Airport Road and the hazard they are creating by sketching and getting clear of metal golf clubs on the ground, preferably where a vacancy exists. The junior high school building will be known as "Rodney Subdivision." The new senior high school will move into the old senior high school.

The policy of giving employed teachers their present high school, building the meeting of March 28 appeared and presented a proposal for an all-purpose room to be used for improvement purposes.

The April meeting of the Board of Education: the Tax Allocation Board.

Mr. Earle Rowland appeared with a proposed extension of his Elm Hurst Subdivision.

A special meeting of March 28 was held at the office of the Superintendent. At such a time that the junior high school building would be completed, the junior high school building is proposed.

A proposed policy for assignment of elementary teachers totaling $175,126.39 were read and orders were given, relative to their fill on Airport Road and the hazard they are creating by sketching and getting clear of metal golf clubs on the ground.

State intangibles tax also due

The Michigan Department of Revenue today reminded Detroit residents of the state intangibles tax due from mortgages, land contracts, including those received by stockholders of various corporations, the interest during 1966. Dividends receivable, or other similar evidence of Michigan tangibles tax is due from any individual taxpayer on Michigan deposits for their depositors. Therefore, no tax is due from the associations are required to pay to the State intangibles tax. Inclusive of all Michigan taxes, the income tax return on April 30. •

BABES IN THE WOODS

"You fellows should grow up on problems related to everyday living; for instance, this week I developed a very bad hook in my golf drive!"
The father of 20-inch rows was Robert Moore, chairman of the Clinton County Soil Conservation District in St. Johns, Mich. Moore, a farmer himself, started thinking about wide rows in the late 1940s when he read about ten-fewer rows. On a farm near Jordan, Minn., Moore grew corn in 10-inch rows and compared it with 20-inch rows. The yield in 10-inch rows was 20 bushels per acre, while the 20-inch rows produced 30 bushels per acre. This was a revelation to Moore, who realized that wider rows could lead to higher yields.

The first field experiment in Michigan was conducted in 1950. That year, 21-inch rows were compared with 10-inch rows in the Ovid high school building lot. The results were impressive, with the 21-inch rows yielding 75 bushels per acre, compared to 45 bushels per acre in the 10-inch rows. Since then, the wider row spacing has become widely adopted in Michigan, with farmers growing crops like corn, soybeans, and beans in 20-inch rows. The wider spacing has been shown to increase yields, reduce competition between plants, and improve soil health.

In his youth, Moore had looked at 15-inch rows and was interested in growing crops in such wide rows. He decided to conduct an experiment to see if this could work in Michigan. In 1966, he chose 15-inch rows because the 20-inch rows had produced excellent results. He planted the first field with 15-inch rows in 1966 and was pleased with the results. The following year, he expanded his试验 to 15-inch rows and 7-inch rows. The results were even more impressive, with the 15-inch rows yielding 120 bushels per acre and the 7-inch rows yielding 93 bushels per acre.

Moore attributes the success of wider-row farming to several factors. First, the wider spacing allows for better light penetration and soil aeration, which improves root development and nutrient uptake. Second, the wider rows reduce competition between plants, allowing each plant to grow to its full potential. Third, the wider rows reduce the need for tillage and other soil disturbance, which helps to preserve soil structure and fertility. Finally, the wider rows reduce the amount of herbicide needed to control weeds, which helps to reduce costs and environmental impact.

Despite the benefits of wider-row farming, there are some challenges to adopting this practice. Farmers need to invest in new equipment and technology to manage wider rows. They also need to adjust their planting and harvesting practices to accommodate the wider spacing. However, the benefits of wider-row farming are worth the investment, and it is increasingly becoming the preferred method of crop production in Michigan and other parts of the world.
Weather influence great on farm market outlook

The April outlook for farm market conditions was not good due to weather and anticipated rains in most of the major grain growing states. Producers and traders alike are forecasting only average to slightly better than average production for the crops of the near future.

• Delaware — A Delmar Seeds variety, Delaware is a high yielding variety. It is an early maturing variety and is well adapted to the New England area.

• DeKalb — DeKalb 85 is a high yielding variety. It is a late maturing variety and is well adapted to the Midwest area.

• Illinois — Illinois is a mid-early maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Indiana — Indiana is a mid-late maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Iowa — Iowa is a mid-late maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Kansas — Kansas is a mid-early maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Nebraska — Nebraska is a mid-late maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Ohio — Ohio is a mid-late maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Oklahoma — Oklahoma is a mid-early maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Pennsylvania — Pennsylvania is a mid-late maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

• Wisconsin — Wisconsin is a mid-early maturing variety. It is a high yielding variety and is well adapted to the Midwest area.

Scientists tell cause, cure for zinc deficiency

The Michigan Agricultural Experiment Station has made a significant breakthrough in the study of zinc deficiency in plants. This breakthrough has been made possible through the use of a new technique developed by Dr. R. F. Davis and Dr. J. W. Ball.

The technique involves the use of an electron microscope to study the effects of zinc deficiency on plant tissues. The results of this study have shown that zinc deficiency causes a reduction in the size and number of chloroplasts in plant cells. This reduction leads to a decrease in photosynthesis, which is necessary for plant growth.

The cure for zinc deficiency is to apply zinc fertilizer to the soil. This will help to replenish the zinc in the soil and improve the growth of plants.

Pioneer state effort wins hog cholera war

In an effort to control the spread of hog cholera, the Michigan state veterinarian's office has begun a state-wide program to test dairy farms for the presence of the disease. The program involves the testing of all dairy farms in the state for the presence of hog cholera virus.

The results of these tests will be used to determine the effectiveness of the state's program in controlling the spread of hog cholera. This information will be used to help plan future control efforts.

Hog cholera is a deadly disease that can affect pigs of all ages. It is caused by a virus that attacks the pig's immune system, causing it to lose its ability to fight off other diseases. The disease can be very difficult to control, and it is important to detect and control it as soon as possible.

Survey shows state free of potato pest

A survey conducted by the Michigan Department of Agriculture and Rural Development has shown that the state is free of the potato pest known as the potato leafhopper. This is a significant finding, as the potato leafhopper can cause serious damage to potato crops.

The survey involved the collection of samples from potato fields throughout the state. The samples were then tested for the presence of the potato leafhopper. The results of the survey showed that the state is free of the pest.

A farmer's time could be worth $100 per hour

Inexplicable retailing facts could save world

Inflationary price increases in virtually all lines of goods and services take a toll on consumers' pocketbooks. Retail distributors who are in the unfortunate position of having to pass along to their customers the added costs of materials, wages, transportation, and insurance, are more serious than the tendency to question the performance of the U.S. mass-distribution system. It is certainly true that prices have risen. Among those living on a fixed income, the result has been hardship. And if inflation continues, the areas of hardship will expand. But a change in price and fairness call for recognition of a few truths. For example, food cost as a percentage of farm income available for spending is the lowest it has been since records were kept -1944 per cent. Another truth is that our mass-distribution system is by its very nature a channel of orderly distribution against price gouging. Unless it, merchandisers operate in an environment of competition and consumer-free choice. Prices are flexible and fair under the inexorable pressure of supply and demand.

No more impressive testament to the efficiency of the American retail distribution system can be found than the recent action of the U.S. government to bring in chain supermarket executives to help survey distribution methods and recommend improvements. This has been done because the techniques necessary to produce, distribute, and sell food efficiently are not yet fully understood. The food production and distribution system has no equal. If hopes of storing of perishable commodities indefinitely, as we now understand its many virtues and quash misgivings of its faults.

Superstate marches on

A few months ago, the national police- men and economists agreed the country needed cooling off, so steps were taken to turn on refrigeration and judging by the various indices, we cooled off. It was easy to slow things down. Then the pulse-takers saw signs of both petition and consumer-free choice. Prices have been dropping. We need cooling off, so steps were taken to get refrigeration in the marketplace. And if inflation continues, the areas of hardship will expand. But a change in price and fairness call for recognition of a few truths. For example, food cost as a percentage of farm income available for spending is the lowest it has been since records were kept -1944 per cent. Another truth is that our mass-distribution system is by its very nature a channel of orderly distribution against price gouging. Unless it, merchandisers operate in an environment of competition and consumer-free choice. Prices are flexible and fair under the inexorable pressure of supply and demand.

SKUNK Cabbage—in plant world, too, it takes all kinds

It is a harbinger of spring—cabbage with yellowish, frilly leaves and usually red or green stems, which are sometimes called "prickly cabbage." It is a native of North America and is found in damp, wooded areas. Skunk cabbage is a unique plant because it emerges from the ground before the snow has melted, and its leaves are covered with a fetid smell that attracts pollinators. The plant's flowers, which open in late winter or early spring, are an important food source for early emerging insects. Skunk cabbage is also known for its use in traditional medicine and as a source of food for hikers and wildlife. The plant's name comes from the strong scent that it emits, which is similar to the odor of skunks. Skunk cabbage is a symbol of renewal and new beginnings, and it is often associated with the arrival of spring. It is a reminder that even in the midst of cold and darkness, there is hope and new life waiting to emerge.
MRS. RALPH BAKER, Mrs. Robert Hebeler Sr. and Mrs. Albert Crocker coupon plan to replenish the store. The budget of $1155.00 was adopted. It was voted to the Polio, "Friends."
