Pawnee

"As far as I can see," said the Pawnee parent, "we've got every thing we've wanted and more." The Pawnee children were excited about the possibility of having a field trip to the zoo. They had been discussing this idea with their parents and teachers for weeks, and now it looked like it might come true.

CHILDREN'S ACTIVITIES

Just the other day, the Pawnee parents were talking about how much fun their children had at the park. They decided to plan a special event for the kids, and the Pawnee Preservation Project was born.

The event was held on a beautiful sunny day, and the children had a blast. They learned about the different aspects of nature and how to protect it. They also had the opportunity to see some of the local wildlife up close.

To give our employees an extended holiday, we will be closed Saturday, July 3rd, for the 4th of July weekend — Reopening Tuesday, July 6, 1976, 9:00 A.M.

Thank you.

INTRODUCING THE EARLY BIRD LOAN

The earlier you pay, the less interest you pay.

The last time you borrowed money, chances are that all the interest was added on at the beginning of the loan. So, there was little advantage in making payments early or making extra payments.

But now there is.

With a Michigan National Bank money on interest. Because, every day interest is computed daily on your unpaid balance. We call it Early Bird Loan.

**Save on early payments.**

So every time you make an extra payment, you save several days of interest. Over the full period of your loan, Early Bird simple interest can mean significant savings over the cost of an ordinary add-on loan.

Let's say, for example, you had taken out an ordinary loan for $3,600 for 36 months. At the Annual Percentage Rate of 11.08%, the total finance charge on the loan would be $648.00. Let's say further that you make an early payment of $250 two months after you take out the loan. You save $250 in interest. Suppose on the other hand, you had taken out an Early Bird Loan for the same amount of money, for the same period of time, at the same interest rate. And suppose you had made the same $250 early payment. With Early Bird simple interest, you would have saved the tidy sum of $887.20.

Pay off your full balance without penalty.

And if you pay off the full balance of your loan early, you save all remaining interest charges without paying any penalty. So, with an Early Bird Loan, our customers can actually control the amount of interest they pay.

Come to Michigan National Bank for an Early Bird Loan. You can use it to help buy a car, remodel your home, pay medical bills or dental bills, college tuition, meet emergency expenses, and a wide variety of other worthwhile needs.

The Early Bird Loan from Michigan National Bank. The earlier you pay, the less interest you pay.
