State, mid-Michigan health units rapped

Clinton County Supervisors on April 29 approved an audit report from the State Health Department. The report was concerned with the adequacy of sewerage and sewage disposal in the county. Supervisors will appoint three individuals to serve as the Clinton County Board of Health. The board will be responsible for the enforcement of health regulations in the county. The board will also appoint the county health officer.

Unfinished maps expensive to Clinton County supervisors

Kurt News, Clinton County Informative agent and George
Minns, Clinton County agent for the Soil Conservation Service,
spoke before the Clinton County Board of Supervisors
Tuesday night about the problem of unfinished maps.

The boards is one of the current problems of Clinton
County supervisors. Minns said that the matter is
expected to come before the board in September,

Three years ago the board approved an application of
soil maps of the county. The maps are needed for
the mapping of all soil units in the county.

The three county supervisors are expected to receive
the maps early in September. The maps are to be
aired in three sections.

Three years ago the board approved an application of
soil maps of the county. The maps are needed for
the mapping of all soil units in the county.

Three years ago the board approved an application of
soil maps of the county. The maps are needed for
the mapping of all soil units in the county.

Sorry, m’am, but we don’t play games.

It’s not our bag.

We don’t give stamps, either.

We simply play it straight by giving you the highest quality foods at the lowest possible prices.

All those frills, like stamps, matching numbers and designs and give-away events are not only time consuming but cost money. Money that invariably comes from your shopping budget because playing games is not part of our business and the costs of such luxury is passed on to customers. We look to make an honest and reasonable profit on the integrity of our efforts and the quality of our products.

We have long observed the practices of economy-wise homemakers and have based our business policies on their desires and demands. (What better place to get marketing information to help us serve YOU better?) Through the years our observations have continually proven that quality and price are the two attractions which command attention.

This leaves no room for tearing stamps or playing games.

And the money you have saved us through your ideas we have taken to provide you with better shopping conveniences and more
pleasant surroundings.

You've shown us that this is important, too.

Something that you can take advantage of each time you visit us . . . not just if you happen to be lucky.

No, we don’t give stamps or play games.

When you leave our store you have sacks of groceries filled with assurance of wholesome nourishment and taste enjoyment.

And they’re clearly marked, “Andy’s IGA.”

. . . that’s our bag.
New Clinton jury selection procedures under way

Conservation needs for County listed

- In response to new Michigan legislation, Clinton County will begin using new systems for jury selection.

- The new system was devised by a group of 11 members from around Clinton County, including Attorney General Dave Kelly. The system was established to help the county's judicial system, which is under pressure due to the number of cases.

- The new system will use a computer program to select jurors, rather than the traditional method of selecting jurors through a random process.

- The system is designed to increase the diversity of the jury pool and reduce the possibility of bias.

- The new system is expected to be implemented in the near future.
Shutt-Honkey vows said in Indiana

Karen Feldplass wed David Irrer

For All Your Camera Needs Shop At

PARR'S

- Shutt-Honkey is one of the most popular vows in Indiana. The ceremony was held at the Marathon Methodist Church in Fort Wayne, Indiana. The couple was married by the Rev. Mr. Kenneth Fricke.

- Karen Feldplass and David Irrer were married on July 22, 1969, at the Marathon Methodist Church in Fort Wayne. The couple was married by the Rev. Mr. Kenneth Fricke.

- The ceremony was held in the sanctuary of the church, which was beautifully decorated with flowers and candles. The bride and groom exchanged vows and rings in front of their guests.

- After the ceremony, the couple and their guests enjoyed refreshments and photographs were taken of the happy couple and their guests.

- Karen Feldplass, a 23-year-old employee of Western National Bank, was married to David Irrer, a 25-year-old employee of General Motors.

- The couple will reside in Fort Wayne, where they will make their home.

See All Of The New POLAROID COLOR PACK CAMERAS

A whole new line of instant picture cameras

- This year, Polaroid introduced its new line of instant picture cameras. The cameras are designed to be easy to use and produce high-quality photographs quickly.

- The new line includes models with black and white film, color film, and a variety of other features. The cameras are available at local photo dealers and department stores.

- The new line of Polaroid instant cameras is sure to be a hit with photography enthusiasts and casual users alike.

LIVER ARRIVES from the

- Polaroid Corporation is one of the leading manufacturers of instant cameras and film. The company's instant cameras are popular among both professional and amateur photographers.

- Polaroid has been in business since 1947 and has been a leader in the instant photography industry ever since.

- The new line of instant cameras includes models with different features and price points to suit a variety of needs and budgets.

- With the introduction of the new line of instant cameras, Polaroid continues to be a leader in the instant photography industry.

BARBARA GOODNIGHT

Oboe recital to be by Mrs Goodnight

The St. Johns Morning Musical Club will present Barbara Goodnight, oboe recital, in the St. Johns City Hall, Sunday, July 28, at 3 p.m. in the First Congregational Church, St. Johns, Miss. The evening will feature music of all periods, beginning with an oboe solo by a student in the First Congregational Church from 1934-1935. After leaving St. Johns in 1955, Mrs Goodnight studied oboe at Kalamazoo and transferred her studies to the University of Michigan, where she received her B.A. degree.

Mrs Goodnight lives in Rockford, Ill., and is the son of Mr and Mrs Alfred Goodnight.

4-H Club Chatter

By Joan Ahlers

Extension 4-Yth Agent

Houghton Lake in Upper Peninsula will be sponsoring a 4-H and open show on Sunday July 6, 10 AM, at the corner of Highway 22 and 23. There will be E1 steers and cattle sold to 300-400 lbs. per class. Place prices will be given in each class with first place prices to be given away.

The show is open to all 4-H members and open classes will be given to the public for a fee of $1 for entries. There will be a 3 AM to 4 AM break for the public to tour the animal exhibits and attend the show. The show will be on a drive-in basis and the public will be invited to attend.

The show will be an informative talk on "Drug Abuse", John A. A. Wilson, local pharmacist, and "How to Measure Distance" by John A. A. Wilson, local pharmacist.

The Kountry Kousins 4-H Club members voted to sponsor an educational talk on "Animal Welfare" by John A. A. Wilson, local pharmacist, and "How to Measure Distance" by John A. A. Wilson, local pharmacist. The club will sponsor a 4-H and open show on Sunday July 6, 10 AM, at the corner of Highway 22 and 23.

Board retains land

The Clinton County Board of Supervisors Monday turned down a bid by an Eaton County firm interested in installing a 100-bed nursing home in the county. The site in question, located between the Children’s Home and the Social Aid Building on Oakland St. in St. Johns, was felt by the supervisors to be more valuable for future expansion of those facilities and advised Clerk Ernest Carter to notify the firm that land is not available in that area.

In related action, the board approved a new septic tank drain field for Smith Hall at the City Park. Cost of the project was estimated at $1,000.

Announcements

The Schrader family reunion will be held Sunday, July 13, at the home of Mr. and Mrs. Lloyd Hopp at 4927 W. Jason Road.

The Boak-Wakefield reunion will be held at the St. Johns City Park on July 20. Apotluck dinner will be served at noon.

Compliments are not always genuine, but fault-finding addicts are always sincere.

REGULAR CLINTON COUNTY ZONING COMMISSION MEETING

The Clinton County Zoning Commission will hold a regular meeting on TUESDAY, JULY 22, 1969 at 8 p.m. in the Courthouse in St. Johns, Michigan.

Any persons having interests in the county, or their duly appointed representatives, will be heard relative to any matters that should properly come before the Zoning Commission.

This is the last ad The Michigan Title Co. will ever run.

There won't be any more Michigan Title Company ads because there won't be any more Michigan Title Company. You see, a while back Michigan Title became part of Transamerica Title Insurance Company, the fastest growing title insurance company in the country.

And now that all the details are complete, we decided to make the name complete. So Michigan Title Company is now officially Transamerica Title Insurance Company.

If you'd like to know what that means to you in terms of efficiency and services, call our Manager of Clinton County Operations, Helen E. Cepko at 224-3286.

Tell her you saw the first Transamerica Title ad.

Middleton, Pompeii, Ashley get wins in pony league action

Middleton and Ashley were the big winners in the 4-H Pony League last week. Middleton’s milkers beat the Ashleys 11-5, while Ashley beat the Spartans 17-9. Both games were played in the Community Center. Middle-ton’s win was boosted by a strong showing from the middle infielders. Ashley’s win was highlighted by a strong performance from the starting pitcher.

TO PERFORM AT CHESANING SHOWBOAT

Peggy Merignac, Linda Byns and Cathy Merignac known as the "St. Johns Trio" will be performing at the Chesaning Showboat in competition and as part of the entertainment on Monday evening, July 14. The show begins at 7:30 p.m., and the finalists in each night's competition will be eligible to compete on Saturday, July 19, for the top prize. The popular trio has appeared in several locally sponsored shows, and all of the girls are from St. Johns.

Excitement comes early to new Land Bank office

It didn't take long for excitement to show up at the new building housing the Federal Land Bank; less than three weeks had passed since employees first began work in their new quarters when a break in routine came in the form of an attempted robbery.

A man entered the building carrying a large black bag. When asked what he was doing there he replied, "I need money." He then proceeded to take about $25 and a ring of keys he assumed to be for a car. He said, "Don't call the police or I'll come back and kill you." He then left the building and attempted to start the car with the keys. When this failed he ran to a wooded area in back of the office.

Mrs. Page said she was afraid to call for help because there was no way she could get the office door closed. Instead she called the local police who arrived and arrested Charles Seifert, of 702 Dickerson, Detroit. Seifert was bound over to circuit court and trial date has been set for July 14 at 1:30 p.m.

West of Grand Rapids, and one is on Interstate 96, one east and one are located along the 9,215 miles of state highways. This family is enjoying picnic facilities at the new Calabria Travel Information Center in Standish, one of nine Information centers operated by the Michigan Department of State Highways.

Fifth annual GOP dinner is Sept. 3

The Republican Party of St. Clair County will be the featured speaker at the annual Republican Legislative Dinner to be held this evening at the White Way ballroom. The dinner will begin at 7:30. The keynote speaker will be John F. Modena, national chairman of the national Republican party.

Local businessmen on moving spree

Michigan travelers can stop for a travel break at any one of the 51 freeway rest areas, 101 roadside parks and 1,500 picnic table sites along the state's 9,215 miles of state highways. This family is enjoying picnic facilities at the new Calabria Travel Information Center in Standish, one of nine Information centers operated by the Michigan Department of State Highways.

REST AREAS ARE RELAXING OASES

Michigan travelers can stop for a travel break at any one of the 51 freeway rest areas, 101 roadside parks and 1,500 picnic table sites along the state's 9,215 miles of state highways. This family is enjoying picnic facilities at the new Calabria Travel Information Center in Standish, one of nine Information centers operated by the Michigan Department of State Highways.

Rest areas prove popular among highway travelers

The Department of Public Works has added another freeway rest area this summer, as a result of recommendations made by a joint state-public hearing held in Michigan this spring.

The site was opened north of Marshall, and at two locations are yet to be made.

The typical rest area provides parking for over 50 passenger cars and about 24 trucks. Rest stops are also available at the rest areas, with 77 miles of picnic areas, 29 miles of picnic tables, and 57 miles of picnic spots.

The American Bank and Trust Company of Saginaw is pleased to announce that it has been selected as the bank to handle the payroll of the Michigan State Trooper Pension Plan. The bank will handle all aspects of the plan, including the collection of contributions, the processing of benefits, and the payment of claims.

Although it is expected that the plan will grow to cover more than 1,000 employees, the bank has already begun preparations for the initial payroll. The bank is working closely with the plan administrators to ensure a smooth and efficient operation.

The bank is the only bank in Michigan that offers this service to local governments, and it has extensive experience in the area. The bank has previously handled similar payroll operations for other organizations, and it has developed a robust system to handle the increased workload.

Wednesday, July 16, 1969

**Chain Reaction**

With great ceremony, the boy gave the lady a rose while she was still. A rapid series of sharp claps proceed as down the line, passed freely at a gap too large, then continued onward. Then, abruptly, every-thing was still.

He was talked speechless. He stopped his Kadillac and sent a I a big, proud smile.

Giving our faith to God is like putting over that first division. It starts a chain reaction—the first result in a richer life, greater happiness and a deeper confidence in ourselves and in the future.

Why not come to church this Sunday?

Let God start a chain reaction in your life.

Accurate certification can save farmers money

Farmers are now participating in the federal and local programs designed to help them achieve accurate certification of their farms. The programs aim to reduce the number of cases where farmers are overcharged for their grain and diverted acreage and to provide a more accurate estimate of crop acreages.

Farmers are encouraged to participate in these programs to save them money and improve the accuracy of their certification. The programs are designed to provide a more accurate estimate of crop acreages and to reduce the number of cases where farmers are overcharged for their grain.

Help refrigerator work with regular cleaning

To keep your refrigerator in good working order, it is important to clean it regularly. Here are some tips to help you keep your refrigerator clean:

1. Turn off the refrigerator and remove all the contents.
2. Wipe the surfaces of jars and containers with warm soapy water, thoroughly rinsed and dried.
3. Dry the refrigerator walls.
4. Use a sharp instrument to remove all contents.
5. Use cold water to rinse out the refrigerator and warm water to rinse off any spoiled food you've found in the freezer section.
6. Use a flat tool to remove any smells from the refrigerator. Either tends to stay clean longer.
7. Use a refrigerator defroster to remove all contents. Frozen foods may be re-used.
8. Use soap or detergent should be thoroughly rinsed and dried.
9. Use a refrigerator defroster to help remove any odors and stains. Soap or detergent should be thoroughly rinsed and dried.
10. Use a refrigerator defroster to help remove any odors and stains. Soap or detergent should be thoroughly rinsed and dried.

Rescue vs. speed

In recent weeks comments have been passed on the nervousness of the motorists and the disadvantages of emergency vehicles being operated at excesses in excess of legal limits. The comments reflect the habit that such travel does carry with it higher chances for mishaps, but obviously speed, in the long run, has not been shown to mean more injuries than slower travel.

It seems only natural that in times of emergency we react quickly but in the case of emergency vehicles this haste does not replace alertness. Thus, too, most emergency vehicles are amply equipped warning sirens, horns or lights and their approach can hardly be termed unsuitable.

But this is a type of emergency vehicle where there are other vehicles which respond to critical situations with less speed and the chances are not as great for the sake of helping persons in need.

Selections

A recent trip through the supermarket brought before my mind the abundant variety of breakfast cereals available to consumers and how many little Fords and small cars may be a beautyful Belkire Heights with luxurious appointments including out of every window, or a Steenspark two which is a pocket sized miniature than the center arm rest. Somewhere in between there's the Prebord Four which has the arm rest but the windows remain tightly closed so the accommodations won't heat up.

Anybody remember Wichenazoo? Now there was a product that did everything from raise your shoe to sellen car but through the years so many related items have been introduced to the market that Wichenazoo seems like an old name. Imagine how vast modern medicine cabinets would be if this tiny little item was still in our medicine cabinets.

Perhaps we are unable to make quick decisions, and if this is the case, we're being forced to think only of the reasons we're thinning out these days is the ranks of the police.

ONIONS, ALS, ORGANIC—Whether they like it or not, the country's colleges and universities are getting into the onion business, and it's a growing field. The problem of finding enough beds for all the students is getting more serious day by day. It is a problem that must be faced.
View from the 87th

By William K. Balieowski
State Representative

The hatful-priced bill pro-
ceding for the construction of the 800 million dollar sports com-
coplex in Detroit was signed into law in a last minute deal early this
morning after months of acrid battle. But the final deal has been
in the planning for the project for more than a year. And much to the
distress of those in favor of the project, the bill will not become law
until after 60 days, 6 months later.

It is the final form in which it was signed, as will be seen in the
tentative initial $10 million list, adored by the 87th Congress and
the 88th District Representative. The bill will be put into a regional
fund in near urban areas. Rep. Swallow of Kent County, cal-
ing the bill "perfect 70/30 formula," said that his amendment, which narrowly
considered and defeated, would have allowed only $20 million (rather
than $390,000 in combined federal and state funds) to go to the local
unites, if 4/5 of a loaf isn't a full loaf.

The controversy over the 70/30 ratio has been a major debate in the
legislature. In January, the Department of Natural Resources and
the Department of Commerce were given a joint budget of $70 million
for state parks, fisheries, and conservation areas.

For allocations to local governments, a joint budget of $20 million
(federal and state) was to be spent on state recreational projects.

In the final form of the bill, the appellate court will be asked to
calculate the allowable projects to be submitted for approval.

If the appellate court will be asked to calculate the allowable projects
to be submitted for approval, the Department may revoke such
allowable projects without the local unit's consent. And if the
allowable projects are not submitted, the local unit's income-tax re-
statement may be met by a loan or refund of tax.

The first time we're always on the lookout for anything that looks
like a small program. We've already seen the pattern. But we're also
looking for only $20 million (rather than $390,000 in combined federal
and state funds) to go to the local unites, if 4/5 of a loaf isn't a full
loaf.

I'm not an obstructionist, and I'm not a legislator who can do it
myself. But make no mistake about it: the bill that passed is a
promise and, as with all promises, it will work out in the end. And
there's no telling how it will work out, one way or the other.

To be aware is a breath of air! That's what we need! But don't stay
submerged, it's into the CLINTON COUNTY NEWS! Busy! you up!
Aims of new county planning group told

What is a county planning commission? The primary function of the County Planning Commission is to make a plan for the growth and development of the county, to coordinate the activities of federal, state and local agencies in the planning of the county, and to recommend policies for the improvement of the county. The commission is composed of five members, who are appointed by the county sheriff. They shall hold office for one year at the pleasure of the sheriff. The commission is expected to function directly on the planning commission. Ernest M. Weber indicated that it would be difficult to get any help from the local Planning Commission. Russell Livingstone, chairman of the Planning Commission, and Tom Snitgen of Holden-Reid, Conservationist, on watershed management. Ernest M. Weber indicated that it would be difficult to get any help from the local Planning Commission. Russell Livingstone, chairman of the Planning Commission, and Tom Snitgen of Holden-Reid, Conservationist, on watershed management.

Warranties Put More Responsibility on Car Owners

While some controversy rages over new car warranty provisions for 1969 cars, there is one area in which there is agreement. The motorist will bear more responsibility for keeping his car in condition.

Actually, even with the more liberal warranties of previous years, routine yet important maintenance was always the responsibility of the new car owner. However, in many instances the owner lulled himself into believing the warranty was a pay-all in case of trouble. This is not the case. The major difference in 1969 new car warranties lies in the length of time most parts (excluding tires and tubes) are covered. New provisions call for 12-month or 12,000 mile coverage. In 1968, the warranty called for two-year or 24,000 mile coverage.

To protect their warranties, motorists must do the following:

1. Change engine oil and oil filter and clean the filler cap at periods specified by the manufacturer. (Typically, every six months or 6,000 miles.)
2. Clean the carburetor air filter and replace it at specified intervals. (Usually, six months or 6,000 miles for cleaning; 24 months or 24,000 miles for replacing an eight-cylinder engine — 12 months or 12,000 miles for six-cylinder engines.)
3. Service the crankcase emission control system every six months or 6,000 miles and replace the emission control valve every 12 months or 12,000 miles. Parts must be cleaned or replaced when needed.
4. Replace the engine coolant at recommended intervals. (Typically, every two years.)

Other owner responsibilities for service are vital to good operation but no time periods are specified. One such item is tune-up including replacing spark plugs, points and condenser. Recommended tune-up procedure is every 10,000 miles. Other typical services that are the motorists' responsibility include the following:

- Wiper blades, brake servicing including linings, lubrication, aligning of lights and front wheels, wheel balancing and other car components which are subject to normal wear.

Sports Car Roar From Sedan May Signal Trouble

Has your family sedan started to develop a sports car “rap”? Instead of taking it to Watkins Glen or Le Mans, better check your exhaust system. That deep-throated roar under the chassis undoubtedly signifies that your exhaust system is defective.

Not only might it earn you a traffic ticket for making too much noise but it could mean a death sentence for you and your family. A leaky exhaust is a potential source of lethal carbon monoxide.

When you hear a noisy exhaust, head straight for your favorite service outlet. Better yet, have a mechanic check your exhaust system next time you car is on the hoist.

Helpful Tips on...
How to Get More Miles Per Gallon

Two drivers of the same automobile may get different gas mileage due to the differences in driving habits. Other factors include driving conditions and mechanical condition of the automobile.

1. Wet driving conditions: Slowing down under wet or snowy conditions conserves fuel. Wet pavement can reduce mileage to 1 mile per gallon.
2. When parked, turn off engine. One minute of idling uses more fuel than restarting user.
3. Starting and stopping. Avoid "jack rabbit" starts, sudden stopping and racing on the green light.
4. Windy conditions. Drive slower if you're interested in better fuel economy.

Here are some suggestions on care and mechanical condition of your car for better fuel economy:
1. Use good grade of gasoline recommended by the manufacturer of your automobile.
2. Be sure the thermostat isn't stuck in the open position. A warm-running engine is more efficient (uses less fuel) than a cold-running engine.
3. Be sure tires are inflated properly.

Beware! Slippery Roads

Summer showers, especially after a long dry spell, can make road surfaces as slippery as winter ice, a special safety bulletin issued by the Rubber Manufacturers Association warns.

The danger of skidding is greatest, says the trade group, during the first 15 to 30 minutes after it starts to rain; up to an hour or more in a light drizzle.

This is due to the little-known fact that rain tends to float up onto the road surface a greasy film of oil, gasoline and rubber residue which becomes a treacherous ice-like lubricant between the tires and the road until enough rain falls to wash it away.

The possibility of an accident on a wet road, says the Association, is between 3 and 10 times as great as on a dry road, in terms of the likelihood of a skid and loss of control of a car. In terms of stopping distance, it may take up to four times as far to stop on a wet road as on a dry road.

TIMING VITAL

Have you ever wondered why proper timing is so important to good performance? According to Champion Spark Plug Company, being only five degrees of advancement in timing can cut 5 horses out of a 200 horsepower engine.

Also, for every three degrees of overadvence, engine octave requirements can rise four units.
Robert Purhill, installment loan officer at Central National Bank, is the man to see when you need assistance in financing an automobile or recreational equipment. Advice and friendly service are the keywords in the loan department of Central National Bank.

Hold It, Mister, Your Battery May Be Okay

Blaming starting trouble on the battery can be like blaming a broken leg on bone failure. In both cases, something is wrong but something other than the affected part is causing the problem.

A well-maintained battery that hasn't outlived its usefulness should not cause starting problems. More likely some other electrical component is at fault and is draining the battery power. For example, faulty wiring, worn spark plugs or malfunctioning distributor may be overworking the battery during starting.

As a result the battery wears down to a point that it may seem dead. The alert serviceman will look beyond the battery as the cause of the starting failure, especially when he is reminded to do so by the customer.

To keep your battery in top operating condition, here are some pointers: A quick visual inspection every time you gas up and a voltage test every six months should assure you maximum efficiency battery life.

It's a simple job for the service attendant to check battery water level and condition of cables and terminals. This should be done at least once a week to guard against premature deterioration.

Get your car ready for vacation time with tires and a checkup at St. Johns Automotive and Tire Discount Center. Owner-operator Dean Fosmoe will personally see to it that you're ready for the highway. Stop in soon. You'll go away pleased.

Finger Tip Service is Available As Good Car Care Comes In Cans

Last year the U.S. Motor Vehicle Bureau registered over 80 million passenger cars, and that number is increasing every year with a total of 114,4 million predicted for 1985. Cars need care, and the Aerosol Division, Chemical Specialties Manufacturers Association, lists dozens of products now packaged in spray form to do the various jobs needed to keep your auto in the best possible running order.

The place to start your car care is under the hood, with an aerosol engine cleaner. A de-rusting spray will loosen nuts and bolts and remove any rust, and a carburetor and choke cleaner will spray away the carbon buildup.

You can stop here if you wish, or go on with some of the protective items that help keep the motor and other working parts in condition. A high-heat engine enamel, specially made for cars, will make the oldest engine look factory-fresh, and also provide protection against rust and weathering.

You can also buy aerosol coating for your battery terminal, fan belt and ignition system which will cut the wear and tear on these parts, saving you some costly repairs and a lot of annoyance.

Now you can turn your attention to protecting and prettifying the outside of the car. Your de-ruster is handy here too, for loosening nuts on the wheels. Has the paint been marred or scraped? You can buy touch-up paint to match almost any U.S.-made car, a lot cheaper than a body-shop paint job.

A combination cleaner/wax will save you the time and trouble of scrubbing the car, and for a really high sheen, use your cleaner/wax first and spray over it with plain auto wax. Then spray a chrome protector on your fenders and other metalwork.

Campers Stretch Vacation Budget For Families

Budget stretching savings for the family figure high in the rising popularity of vacation by campers.

Figure it out, say those who know. Motel rooms might average $10 a day, meals $20. That’s $520 for two weeks. Vacationing in a camper, the family has brought along its own comfortable sleeping facilities, its own efficient kitchen, as well as a daytime living room and unlimited mobility.
KEEP YOUR CAR Safety-Fit!

Your safety and the safety of others can depend on how well your car is maintained. So don't take chances. Maintain its safety equipment - brakes, steering, tires, lights, turn signals, safety belts, door locks, wipers, washers, defrosters, glass, mirrors, horns, exhaust systems. Have all these items checked especially before making a trip and before vacation-time driving. We will be glad to check your car for you, at any time. How about... soon?

Whenever You Go—wear safety belts, lock car doors, drive safely!

Versatility of Design Paves Way for Tailoring Outfit to Your Pleasure

Boating Riding Crest of Recreational Wave

Pleasure boating is riding the wave of the recreational quality. More people are enjoying better equipment more often than ever. In just ten years, reports Johnson Motors, the world's largest manufacturer of outboard motors, the number of recreational boat owners has mushroomed from 27 million to more than 42 million.

Last year, boaters from Northern Maine to Southern California, from Anchorage to Key West, all through Canada, spent $3-billion on everything from powerful high-horsepower outboard motors to rope "line" in marine jargon and fuel. They got their money's worth. The modern outboard is no last-minute brainchild of a backyard inventor, glued together in a garage as a sort of semi-vocation.

20th Century Technology

It is, instead, an intricate piece of 20th Century technology, often designed with the help of computers, always years in development. Take Johnson's new 115-h.p. outboard for 1969. Engineers with college degrees on their office walls and grease under their fingernails designed and tested prototypes for years, eventually settling on a design.

Periodic Brake Checks Easy

Brakes, like all-day suckers, have a habit of wearing away slowly. So, it's a good practice to test your brakes periodically to make sure they can stop your car safely.

Every week, test the hydraulic system by firmly pressing your foot against the pedal. If the pedal moves gradually towards the floorboard, you are losing vital pressure. Have the problem corrected immediately.

Periodically, test stopping ability in a flat, open area where no other cars or obstruction are present. Accelerate to 30 miles per hour, then apply the brakes with your hands off the steering wheel. If the car pulls to one side, you may have brake trouble.

Overheating Can Be Forestalled By These Checks

While most cars made today have cooling systems that are "sealed" in the factory, a wise motorist still takes precautions against engine overheating. Here are some basic precautions to take to make sure your car keeps its cool.

Test the condition and tension of all drive belts as well as radiator hoses. Check the radiator and hoses for leaks. Also check pump gaskets and tightness of the pulley hub on the water pump.

Periodically, test stopping ability in an area where no other cars or obstruction are present. Accelerate to 30 miles per hour, then apply the brakes with your hands off the steering wheel. If the car pulls to one side, you may have brake trouble.

Overheating Can Be Forestalled By These Checks

Test the condition and tension of all drive belts as well as radiator hoses. Check the radiator and hoses for leaks. Also check pump gaskets and tightness of the pulley hub on the water pump.

Check to see that there is no foreign matter on the cooling fins and that the overflow tube is not obstructed.

In cleaning your windshield, don't forget the inside. Tobacco smoke can put a film of residue on the glass and distort vision. So, if you smoke, periodically clean the windshield with a window washing solvent.

Car Care Cuts Air Pollution

What Helps Here Also Saves Money for Auto Owner

Good car care takes on added importance these days - to you, your pocketbook, and the air you breathe. This is especially so if you own a car built during the past seven years, according to the American Petroleum Institute.

If your car is a 1968 or later model, it is equipped with a device to control pollutants that would otherwise come from the engine crankcase. If you own a 1968 or 1969 model, it also has a system for reducing tailpipe emissions.

These devices and systems, however, will continue to work properly — and, what's more, allow the engine to perform satisfactorily — only if you have your car checked regularly. A periodic tune-up will save you money in fuel and repair costs, give you a smoother running car, and help cut down on air pollution.

1963: Crankcase Controls

The first device to control automotive pollution was installed nationally in all 1963 cars. The device — called the "positive crankcase ventilation," or PCV valve — was designed to recirculate unburned hydrocarbons back to the engine where they have another chance to burn.

Formerly, these unburned gases escaped past the piston rings into the crankcase, where they were vented into the air. Installation of the PCV device cut total hydrocarbon emissions from the typical car by 24 percent, compared with cars without the device.

The PCV valve will continue to do its job in controlling hydrocarbon emissions if it's periodically inspected and serviced as required under your car warranty. Otherwise, you may be in for trouble. Over a period of time, crankcase fumes tend to build up gums or varnishes. These could cause the valve to stick and not function.

1968: Exhaust Controls

The second significant step in automotive pollution control occurred, nationally, with the installation of exhaust control systems, beginning with 1968 cars. These systems are designed to control both hydrocarbon and carbon monoxide emissions.

In most 1968 and 1969 cars, the exhaust control system is based on modification of the engine to achieve a lean fuel mixture and retarded ignition to produce higher combustion temperatures. These systems are thus very effective in reducing tailpipe emissions but they make regular maintenance all the more essential. Here's why:

• Your spark plugs run hotter and may have to be replaced more often.
• Only periodic tune-ups can keep the pollution control system and its parts (air pumps, pump drive belts, air hoses, and other hardware) working at top efficiency — both to insure satisfactory and economic engine operation and to minimize exhaust emissions.

The auto and oil industries are continuing to work to further reduce auto pollution. The 1970 models will have improved exhaust controls to reduce hydrocarbon and carbon monoxide emissions by some 30 percent below the levels of the 1968 and 1969 models.
An untuned car is horns in your ears.

Horns in your ears...a missed appointment...a tow-truck ride...a pounding head and a lot of other things to spoil your driving. That's what an untuned car is.

Untuned car trouble results from old worn spark plugs in an untuned engine. The cure is quick and effective. It's a Champion Tune-Up: a new set of Champion spark plugs plus other basic tune-up items you may need.

You'll feel the difference pronto. Trouble-free starting. Quicker acceleration for safer highway passing. More power. Dependable performance. And an average saving of over a gallon of gas per tankful—proved in United States Auto Club certified tests.

For trouble-free driving, get a Champion Tune-Up now—and every 10,000 miles. Because an untuned car is trouble!

The heart of a tune-up
**Camping-Boating for Outdoor Fun**

You won’t have any traffic problems this summer when you go over the waves for a boat camping vacation. Throughout the country, increasing numbers of families are discovering there’s more fun to be had by land and by sea. “Camping by boat can bring much pleasure to the whole family who will enjoy seeing their campsite and its environs from this new vantage point,” comments Jack Hamilton, boating and camping expert at the Thermos Division of King-Dickey Thermos Co., the company whose outdoor living products are so familiar to those who take to the woods and to the waterways.

“It’s a life that comes easy once you know the ropes,” adds Hamilton. “For instance, how do you pick a campsite? There are thousands of public campgrounds dotting the United States and many of them are located along boating waterways.

**Choose Spot First**

“First decide what your family likes best. Do they fancy mountains, deep woods or beaches? You can be certain there’s a campground to suit their preference whether it’s public or the family’s own. The facilities at the camps. The National Parks will provide you with available information, too.

For information on public camps, write the State Conservation Department in whatever state you’re planning to camp. It will probably be the best six-cent investment you’ll ever make. They’ll send you maps, lists of lakes and rivers with campgrounds and information on the facilities at the camps.

**Snapshots Add New Dimension To Boating Fun**

Snapshots add a new dimension to boating fun, but there are a few photographic bugs that should be guarded against overexposure — water reflects far more light than ground surfaces.

The fast shutter speeds — 1/1000th or 1/2000th of a second — and don’t bring along the boat because it’s moving all the time. Watch out for water on the lens, too; even one drop can spoil the picture.

Finally, write the Johnson Hardware News Bureau, 2111 South Third St., Madison, Wisconsin, to ask about insurance.
First Test Track
Built in 1915

Proving grounds were introduced by the industry in 1924. But what probably was the first test track designed specifically to test and evaluate production vehicles was built by a Detroit auto maker back in 1915. A half-mile planked track circled a steel-fabricated "hill" more than 40 feet high, which cars had to climb prior to leaving the factory.

If your travels take you to French Canada or Mexico this summer, Champion Spark Plug Company offers a few automotive phrases that may come in handy.

Spark plugs are "bougie" in French and "bujias" in Spanish. Gasoline is "essence" and "gasolina," tires are "pneu" and "pneumatico," brakes are "frein" and "freno," respectively in French and Spanish.

Race Drivers Point Up Importance of 'Belts'

Young people, supposedly at odds with the older generation, have at least one area of agreement with their parents. Both are ignoring the lifesaving use of car seat belts.

Champion Spark Plug Company, through its Highway Safety Program, queried nearly 12,000 high school seniors on seat belt wearing habits; in cars equipped with belts, well under 50 percent use the restraining devices.

Only 14.6 percent said they always use belts. Another 29.9 percent said they never used seat belts. There was little difference in use between boys and girls, with less than a percentage point difference in their answers.

In addition to youngsters driving cars equipped with seat belts but not using them, large percentages are driving cars which have no seat belts. Of those driving their own cars, less than half of the vehicles are equipped with belts. Over 63.6% of all cars, including those belonging to parents, were equipped with belts.

The students' failure to wear seat belts was not because of their failure to recognize the consequences, the survey found. Almost two-thirds of them identified not wearing belts as a major contributing cause to traffic fatalities.

Estimates by the National Safety Council show that about one out of five fatalities could have been avoided if seat belts were being worn.

According to J. R. McGeorge, Champion's Public Relations Manager and Director of the Highway Safety Program, "In our presentation to school groups we have Indianapolis race drivers stress the responsibilities as well as the skills of operating a car.

A race driver would no more think of operating a car without a seat belt than he would without a steering wheel," McGeorge said.

We see warning signals every day of our lives, whether at work, at home or on the road. How many do YOU take heed to?

To be a safe driver you must take heed to warnings when you are faced with them. If you don't your family might be having supper alone tonight because you won't be able to make it. You might just have an accident and have to spend the evening elsewhere.

Randolph's Speedy Car Wash, owned by Mr & Mrs Dale Randolph, is located on South US-27 and is open 24 hours a day to serve you. Always room for everyone—12 bays in all, including one automatic car wash. The automatic washes, rinses, and waxes your car in only two minutes for just $1.00. There's also a machine to give you change and a chamois machine for your convenience. Anytime you need a car wash, Randolph's Speedy Car Wash is the answer to your problem.

Egans Enlarged Service Department

At Egans they can take even better care of your car when you bring it in to be serviced because of their newly enlarged service department. They have come a long way since the fire in January, so stop in and see for yourself. They still have the same friendly service you have been enjoying all these years.

Vacation

MAKE SURE
YOUR CAR IS
"VACATION
READY"

THE GREAT
OUTDOORS
AWAITS YOU AND YOUR FAMILY

There's nothing finer than seeing this country of ours. It's a beautiful way to vacation. But, don't take chances on having a bad time because of car trouble. Take your car to your local service station and have it made "Vacation Ready". A thorough check of your car's history, brakes, tires, lights, etc., could save you costly repairs on the road.
Call for an appointment to have your car serviced today.

HAVE YOUR CAR SERVICED AT YOUR FAVORITE STATION!
