Free textbooks will cost Clinton schools $100,000-plus

By REG KARLE

More than $180,000—how's that the price tag Clinton schools have been quoted for textbooks that are supposed to be provided free by the state Department of Education? According to the report by the state Department of Education, the cost is based on the number of textbooks needed for each grade level. The actual cost is expected to be lower, but it is not yet clear how much lower. The educators are currently working with the state to try to reduce the cost of textbooks.

Another problem is that most of the textbooks are out of print or unavailable. This means that the schools have to purchase new books, which can be expensive. In addition, the books are not always the latest edition, so the students may be learning outdated material.

The state has asked the Clinton Board of Education to consider a plan to purchase the textbooks at a lower price. The board is expected to discuss this plan at its next meeting.

DeWitt officials fear delayed school opening

By TIM YOUNKMAN

DeWitt school officials insist that Friday there will be some change at the start of the school year. If the negotiations continue for another week, it's possible that the school might not open on time.

Superintendent James Ritchie said that the teachers union has not yet reached an agreement with the school district.

"We are really worried about it," said Ritchie. "It's kind of hard to turn to a taxpayer and ask them to pay this after everything else."

Ritchie did estimate it would cost $7,000 to supply education for college courses and $2,000 for a teacher with a garnishee or order of attachment, and $1,000 for a teacher with a garnishee or order of attachment."

"It comes down to the decision of eliminating some of this or other things," he said. "But we've got to keep on working."

There is no doubt that the DeWitt schools will open their doors on time, although most of the roads and paperwork could be completed on a later date.

"The press was barred from the hearings," said Ritchie. "I don't think it was purposely timed.

"If the negotiations continue into September, Ritchie said the board would comply with any agreement that the teachers union and the school district reach."

"What would happen if we had a teacher strike or lengthy bargaining," he said. "We can't go back and forth on this."

Ritchie said that in the past, the Ovid-Elsie District has spent more than $1,000 on textbooks. This year, the cost averaged about $6 per child and adds up to about $15,000 for all students.

"This cost averaged about $6 per child and adds up to about $15,000 for all students," he said. "We can't go back and forth on this."

"I think the schools have to be prepared," he said. "We can't go back and forth on this."

"I would like to see the school district offer a salary proposal," he said. "But with a strike or lengthy bargaining, we can't go back and forth on this."

Free textbooks to cost $100,000 in Clinton
Continued from Page One

...it was said.

He said the estimate was based on various factors, including the cost of buying the books and the cost of mailing them to students.

"We looked at a number of different options," he said. "But in the end, it was determined that buying the books would be the most efficient way to do it."...

I-69 corridor through Clinton
approved by highway commission

Approval of a corridor for the proposed Interstate 69 Free way in Clinton and the surrounding area has been announced by the State Highway Commission.

The commission conducted hearings at a number of locations along the proposed route, with public meetings held in a number of cities and towns.

The I-69 corridor will run from U.S. 23 near Reed City to I-96 at Gratiot, passing through the cities of Ludington, Manistee, and Traverse City.

The highway commission approved the route for the corridor, which will include the existing M-78 Freeway northeast of Traverse City, and will run parallel to the Lake Michigan shoreline.

The commission's decision follows a review of alternatives for the corridor, including a possible extension of the existing M-78 Freeway and a new route through the city of Manistee.

The commission's decision was based on a number of factors, including the need for improved transportation links in the area, the potential for economic development, and the need for improved safety along the existing M-78 Freeway.

The decision was praised by local officials, who said it would provide a much-needed link to the region.

"This is a major step forward," said Mayor John Smith. "It will help to attract new businesses and improve the quality of life for our residents."...

Ballenger attends Florida conference

A new road is to be constructed near Perry, according to a statement by Gov. John Engler.

The governor said the road, which will run from I-96 to U.S. 27, will be constructed to reduce traffic congestion in the area.

The road will also provide access to the proposed Interstate 69 Freeway, which will run from U.S. 23 near Reed City to I-96 at Gratiot.

The road is expected to be completed by the end of the year, and will be financed through a combination of federal and state funds.

The governor said the road is part of a larger plan to improve transportation links in the state, and is part of a wider effort to attract new businesses to the state.

"This is just one example of the improvements we are making to our state's transportation system," said the governor. "We are committed to ensuring that our residents have access to the best possible facilities."...

Outgrow Bedwetting

When?

Until the childoutgrows the habit, his eyes will still be closed against the urge and he will act accordingly. Often he will act out of habit, even if logical suggestion were made. When this occurs, it is best to get advice from a professional who specializes in bedwetting. They can help develop a plan that may involve techniques such as relaxation training, biofeedback, or a combination of these with medication. It is important to provide consistent and positive reinforcement for the child's efforts.

Carolee Baker bride of Del Duane Allen

The marriage of Carolee Baker of Berlin, Ger-
dany and Del Duane Allen of Hanau, Germany,
was solemnized, July 17, in the Catholic Prin-
cipal Church, St. Johns. The wedding theoc-
cy took place at 3 p.m. in the presence of the
Mayor of Hanau, Germany and about 50 Amer-
can tourists. 

The bride is the daughter of Mr. and Mrs.
Carl Baker of Berlin, Germany. The groom
is the son of Mr. Henry Baker of Berlin, Ger-
dany. The couple, who have been friends
for many years, met in Berlin where the bride
and her father and the groom reside.

The bride is a graduate of the University
of Berlin and is employed in the hotel
industry. The groom is a graduate of the
University of Hanau and is employed in
the chemical industry.

The couple plan their wedding reception
in Hanau, Germany. They will reside in
Hanau, Germany. Special invitations are
extended to all friends and relations of the
bride and groom.

Connie Marten bride of Rodney Richards

Connie Marten became the bride of Rodney A. Richards, a graduate of the University of Illinois, July 17, in the Catholic Principals Church, St. Johns.

The bride is the daughter of Mr. and Mrs. Charles Marten of the University of Illinois and is employed in the hotel industry. The groom is a graduate of the University of Illinois and is employed in the chemical industry.

The couple plan their wedding reception in St. Johns, Michigan. They will reside in St. Johns, Michigan. Special invitations are extended to all friends and relations of the bride and groom.

Exchange student returns to France

Sitting in a room to discuss

Conflict and its impact on

students is a lifelong struggle

for many young people. Here,

junior Mary J. Johnson

from France, shares her

story.

"It was hard to leave my

family and friends," she

said. "But I was excited to

learn about American culture.

I've made many new friends

here and have enjoyed

exploring new places."

Johnson visited St. Johns

for the first time when she

was a child and has always

dreamed of returning. This

year, she has had the chance

to do so.

"I am grateful for this

opportunity," she added. "I

hope to continue my studies

in the United States and

perhaps even return to

St. Johns one day."

Federal employees may register

In compliance with a recent U.S. Supreme Court decision, federal employees, regardless of which political party they support, are entitled to register and vote in Michigan elections. In several states, membership in the government has been considered an occupation which entitled a federal employee to vote.

General Telephone Co. expansion progressing at office in St. Johns

Mr. Merritt B. Scharnweber, of 817 Church St., St. Johns, a switchman for General Telephone, has completed an advanced course on the operation, testing and maintenance of advanced "toll ticketing" telephone equipment, which makes possible the individual dialing of station-to-station long distance telephone calls. The specialized course taken by Scharnweber is part of General Telephone's continuing program to provide training for its employees, highly skilled equipment-maintaining technicians and engineers.

Scharnweber joined General Telephone in 1960. He and his family lived in downtown St. Johns. He enlisted in the Navy in January 1967 and attended basic training in Great Lakes, Illinois. He then attended Radar School in Georgia and later returned there for electronics training. He has been serving aboard the Ranger since July 1967 and completed his four-year tour of duty aboard the Ranger.

Dick Johnson installs new equipment.

Scharnweber completes Gen Tel L-D course

Merritt B. Scharnweber, of 817 CHURCH ST, JOHNS PHONE 224-2327

St. Johns, a switchman for General Telephone, has completed an advanced course on the operation, testing and maintenance of advanced "toll ticketing" telephone equipment, which makes possible the individual dialing of station-to-station long distance telephone calls. The specialized course taken by Scharnweber is part of General Telephone's continuing program to provide training for its employees, highly skilled equipment-maintaining technicians and engineers.

Scharnweber joined General Telephone in 1960. He and his family lived in downtown St. Johns. He enlisted in the Navy in January 1967 and attended basic training in Great Lakes, Illinois. He then attended Radar School in Georgia and later returned there for electronics training. He has been serving aboard the Ranger since July 1967 and completed his four-year tour of duty aboard the Ranger.

Dick Johnson installs new equipment.

Scharnweber completes Gen Tel L-D course

Merritt B. Scharnweber, of 817 CHURCH ST, JOHNS PHONE 224-2327

In the State of Michigan a hearing be held at which said creditors must file sworn claims with the Administratrix, W. J. Clark, Administratrix, 708 N. Ottawa, St. Johns, Michigan. A hearing will be held for the allowance of his final account, and for a determination of heirs. Persons interested in said estate are directed to said hearing.

It is Ordered that on Wednesday, August 26, 1970, at 9:30 A.M., in the Courthouse in St. Johns, Michigan, a hearing be held on the petition of Harold S. Beardslee, Administrator, for a determination of heirs. Persons interested in said estate are directed to said hearing.

STATE OF MICHIGAN—The Probate Court for the County of Clinton, in and for the Judicial Circuit of the State of Michigan, having heard and considered the petition of Anna M. Henthorn, Executrix, 4611 N. U.S. 27, Bath, Michigan, for a hearing on the appointment of residue, now do hereby order that on the 21st day of October, 1970, at 10:00 o'clock in the forenoon, at the Court House in St. Johns, Michigan, a hearing be held on the petition of Anna M. Henthorn, Executrix, 4611 N. U.S. 27, Bath, Michigan, for an order appointing a person to administer the residue of the estate of Anna B. Henthorn, late of Bath, Michigan, deceased.

The Clinton County News

(Continued from previous page)

**'Yes' to road plan**

We support the Clinton County Highway Commission proposal for a one and one-half mile levy for the improvement of county roads.

In our judgment the request is realistic and based on sound planning which, if granted, will provide county residents greatly improved roads in a much shorter period of time. In addition to easy connectivity, the commission's three year program will be hindered by increased costs if the plan is not debated by voters early in the fall.

The road commission and entire staff have worked diligently toward a constantly improved plan for the future. That is the way the future is made for the future. That is the way the future is made.

---

**Eternal optimists**

Hope springs eternal they say. These may not be the exact words of the ancient expression, but they at least serve to Ilus­

"The weight of the world is upon my shoulders"--the first to awaken to a need for change. If each new generation failed to start passing along the dream, civilization would indeed be out with high Ideals and an urge to improve upon the past, civilization would indeed be.

---

**Generations of change**

If a new generation failed to start passing along the dream, civilization would indeed be out with high Ideals and an urge to improve upon the past, civilization would indeed be.

---

**Deadlines**

Because we haven't heard of a company that makes automobiles with all the new, advertising copy and plans to place in print and to condition, it becomes necessary for the Clinton County News to impose deadlines to meet these requirements. Any copy that may be sent in for proper typesetting, forward this week or next week.

THINK
Driving with a burned out headlamp or broken tail light is thoughtless and dangerous. Give your lights a thought and light the way. Check them for condition and aim. Make sure you are seen in the right places.

About 80 percent of all families own at least one automobile. One out of three own more than one car.

HOT NEWS ON BRAKES
In an average day's driving — and stopping — your car's brakes build up enough energy to heat your home. Can your brakes stand up to this kind of torture? Have them checked frequently.

DOES YOUR INSURANCE INCLUDE A FAST CLAIM SERVICE?

An untuned car is all kinds of trouble! But it's trouble you can avoid right now by getting a Champion Tune-Up. That's a new set of Champion spark plugs plus other basic tune-up items your car may need.
You'll enjoy quicker acceleration for safer passing, and better gas mileage too. And make sure you specify a Champion Tune-Up. More than 20 million motorists have already switched to Champion from other brands. The reason? Better performance! Tune up with Champions once a year—or every 10,000 miles. The heart of a tune-up!
RANDOLPH'S SPEEDY CAR WASH

Randolph's Speedy Car Wash, owned by Mr & Mrs Dale Randolph, is located on South US-27 and is open 24 hours a day to serve you. Always room for everyone—12 bays in all, including one automatic car wash. The automatic washes, rinses, and waxes your car in only two minutes for just $1.00. There's also a machine to give you change and a chamois machine for your convenience. Anytime you need a carwash, Randolph's Speedy Car Wash is the answer to your problem.

Just to prove he's one of the "Dodge Boy Good Guys", Red Lundy will give you a square deal on this Coronet 440 or any other car on display at Lundy Motors. Stop in today.

Your Car Acting Up?

When your old, faithful car still acts old after a good tune-up, the problem may lie deep in the heart of its engine. Valve work, rings, bearings or a combination of these services may be indicated.

What are the symptoms of needed engine work and how much might it cost? The engineers of McQuay-Norris Manufacturing Company, a major manufacturer of engine components, offer the following guide lines. Price estimates are based on a popular, standard sized car.

* * *

SYMPTOMS: Engine jumping or loping, Lack of power, Poor Gas mileage.

POSSIBLE WORK NEEDED: Valve Job — A simple (and usually free) vacuum test will show if one or two valves are badly burned.

COSTS: $70.00 to $100.00 depending on engine type (6 cyl. or 8 cyl.) and amount of work needed.

* * *

SYMPTOMS: Low key rumbling sound in engine, Oil consumption, Using too much oil, Power loss, Car stalling, Fouling spark plugs.

POSSIBLE WORK NEEDED: Ring Job.

COSTS: $100.00 to $155.00 depending on engine type (6 cyl. or 8 cyl.).

* * *

SYMPTOMS: Low key rumbling sound in engine, Oil consumption, Using too much oil, Power loss, Car stalling, Fouling spark plugs.

POSSIBLE WORK NEEDED: Ring and Bearing Job.

COSTS: $125.00 to $185.00 depending on engine type (6 cyl. or 8 cyl.).

Let the "other guy" know which way you plan to go, give him the signal.

Chance of Mishap Is Estimated By Safety Council

What are a driver's chances of having an accident in his lifetime? According to the National Safety Council, it depends partly on the distance he drives.

A person who drives 12,000 miles a year has one chance in three of having some kind of an accident. There is one chance in four that damage will be limited to property, one in 40 that there will be at least one injury, and one in 1,300 for a fatality.

One who travels 8,000 miles a year stands one chance in five for any accident, one chance in six for a property damage accident, one in 40 for an injury accident, and one in 2,000 for a fatal one.

A driver who goes 4,000 miles a year has one chance in 10 for any accident, one chance in 11 that only property will be damaged, one in 110 that there will be personal injuries, and one in 4,000 that it will result in death.

A driver must keep his car—and himself—to improve those odds, the Council says.

WiseDriver Keeps Fire Extinguisher In Car

The wise motorist carries a fully-charged fire extinguisher in his car at all times. When you need it there is no substitute.

The preferred extinguisher is the stored pressure dry chemical type. This type can be used on any kind of fire and does not create toxic gases or evaporating liquid types. It should have at least 3½ pounds capacity.

Two kinds of such extinguishers are available. One uses a throw-away refill cylinder. The other must be taken to an extinguisher service shop for recharging. Either is suitable.

The extinguisher should be reserved for emergency use only. If one intends to use an extinguisher for other purposes, such as putting out a campfire, carry spares.

Plymouth makes it '70

Our basic Unibody has over 4000 individual welds to make it strong and quiet. Torsion-bar suspension is up front.

Sport Fury '5/23' 2-dr. Hardtop

Standard. No one else in Plymouth's class can say that. That "solid-structure" finish is not only beautiful, but practical. Fury's 7-step dip-and-spray treatment is a real rust resistor. And the two coats of acrylic enamel can be buffed back to showroom lustre even after years of exposure to the elements. That means money in your pocket at trade-in time.

Options include Chrysler Airtemp air conditioning, power brakes (fren or disc), power steering, Vinyl roofs in four colors and two grains, an AM/FM stereo radio, tilt steering with a Rim-Blow horn switch, and Deluxe wheel covers.

Car Care Calendar

No one ever planned a car breakdown. The annoying inconvenience a breakdown produces makes them as welcome as an overdrawn notice from the bank.

Conversely, few people ever plan a maintenance schedule to insure against breakdowns. However, the wise car owner will schedule his car's servicing needs on a routine basis to avoid a sudden and sometimes expensive loss of transportation.

Here's a list of necessary services, listed according to when they should be performed. Items preceded by an asterisk (*) are based on normal wear or service cycle.

- **MONTHLY** — check radiator level, fan belt, transmission oil, tires, battery, windshield washer fluid, lights.

- **EVERY TWO MONTHS** — in addition to the above, change engine oil, test tailpipe, air pollution system.

- **EVERY FOUR MONTHS** — change oil filter, clean air filter.

- **EVERY SIX MONTHS** — have an engine check, lubricate the chassis, test battery, check wiper blades, brake system, wheel alignment, wheel balance, rotate tires.

- **EVERY TWELVE MONTHS** — flush cooling system, install new antifreeze, replace front wheel bearings, replace anti-air pollution elements, major engine tune-up.

- **EVERY 30 MONTHS** — *replace* battery and cables, *adjust* transmission linkage, *replace* tires.

By having all these services performed and by taking normal care of the appearance of your car, you'll do more than have dependable transportation at all times. You'll be driving a car as good as new when that final car payment is made. And that will help you from getting those overdrawn notices from the bank.

Lloyd Harris and Roger Moore of Harris Oil put the emphasis on service. And when Lloyd and Roger aren't around, Jim Ritter and Hugh Eldridge make sure Harris Oil customers are well satisfied.

Use Caution When You Remove Radiator Cap

The simple act of removing the cap from an overheated car radiator can lead to painful, sometimes disfiguring, burns and burns. Cooling systems in modern vehicles are often under such tremendous pressure that the sudden de-pressurization which occurs when the safety radiator cap is removed can cause a cloud of scalding steam to erupt into the face of the person removing the cap.

If your car's engine overheats, steam or smoke emerges from under the hood, or you detect a smell of burning rubber, stop driving as soon as safely possible. Then turn off the engine. Don't release the radiator cap until all evidence of overheating subsides! You may have to wait several minutes for it to cool. You should also protect your hand by wearing a glove or applying a heavy padding of rags between your hand and the radiator cap. If the cap has a pressure release device (such as a lever, a button, or a turn knob), activate it to allow any excess steam to dissipate itself.

Turn the cap in a counterclockwise direction until you feel the seal release. When the hissing sound subsides, the cap can be removed safely. If it is necessary to add water to the radiator, do so with the engine running! Add water very slowly so it can warm up in the radiator before passing into the engine block. If water is added too quickly, the abrupt change in temperature could crack the engine block.

Following an overheating experience, your car's cooling system should be thoroughly inspected by an experienced mechanic. Overheating can seriously damage metal parts.

NOT DIRT CHEAP

A dirty air cleaner on your car's engine can cost you up to thirty-two dollars a year in wasted gasoline — to say nothing of extra engine wear from added grime. Let your engine breathe easy — check the carburetor air cleaner often and replace when recommended.

QUIET BUT DEADLY

A faulty exhaust system Is called the quiet killer. It can allow deadly monoxide fumes to enter your car, make you drowsy and impair your driving judgment. Don't take chances. Have your car's exhaust system checked.
“Lube Job”
Chances are you’re also getting “anti-breakdown” insurance with every one.

— These Checks —
When you get that pre-vacation lubrication at your favorite service outlet, you’re likely getting more than a freshly-greased chassis. Chances are you’re also taking out an anti-breakdown insurance policy.

According to Chek-Chart Corporation, more service outlets are conducting safety inspections every time the car is on the hoist for a lubrication. The importance of such inspection is increasing since extended lubrication intervals recommended by manufacturers mean that cars are on the hoist less frequently.

Chek-Chart recommends the following components be inspected during a lubrication and any necessary defects be corrected:
- Brake system
- Steering and suspension
- Shock absorbers
- Tires and wheels
- Exhaust system
- Fuel system
- Cooling system
- Drive line units
- Throttle levers
- Seat belts
- Electrical system
- Lights and horn
- Locks and latches
- Visibility items such as glass, wipers, washers, mirrors and defrosters

In inspecting these systems, a trained mechanic will check for various fluid leaks or low levels of lubricants. Particularly sensitive areas are brake fluid reservoirs, master cylinder leakage, power steering fluids, shock absorbers and drive line lubricants.

If you spot any leakage on your driveway or garage floor, bring it to the attention of your mechanic.

Make Safe Skid Recovery With These Moves
Henk de Vries cites the following procedures to get the wheel rolling again:

- Cut engine power but not so violently as to worsen the skid. The technique is the same for a rear wheel skid where the rear of the car tends to swing forward or the four wheel skid where all wheels are sliding.

In a car with manual transmission lift your foot off the gas and declutch (depress the clutch pedal). With an automatic transmission, all you need to do is take your foot off the gas and the torque converter will slow you down.

In a front wheel skid, usually induced by cornering too fast, the technique is different. With an automatic transmission, gear down and with manual shift, do not declutch.

Then, in all skid conditions, countersteer out of the skid by turning the front wheels in the same direction the rest of the car is sliding. Immediately turn the wheel around in the opposite direction or you risk a dangerous second skid.

With children out of school for the summer, and popping out in the darneddest places, it’s important for your automobile to be running correctly. Here at Egan’s our expert mechanics are trained to make sure when your car leaves our garage, it’s in tip-top condition. There are many aspects of driving to be considered, but if your car is untuned or your brakes out of adjustment you could be in more trouble than you ever bargained for, so to be sure, let us check your car over so you can have a fun yet safe summer.

**Don’t Clown Around Behind The Wheel!**

Drive Carefully . . .
Accidents Are No Laughing Matter!

An automobile is no place for you to be the life of the party or play the clown! Every time you get behind that wheel you take upon yourself the responsibility for your life as well as the lives of others . . . that’s why driving is a privilege not a right. Don’t abuse your privilege by risking human lives through silliness or carelessness ... remember, there’s no fool like a dead fool. An untuned car is also a menace to you and others. Be smart, not dead. Make sure your automobile is in condition for safe driving.

**Most Mileage Is Clocked In Summer**

After a dry spell, a light rain or drizzle creates a thin, greasy film on smooth road surfaces. It is slick, and it is dangerous, because drivers are not concerned about skidding at this time of the year.

Bald tires increase the danger. More miles are driven during the summer than at any other time of the year and without realizing it, tires may wear beyond the safe point. When there is less than 3/32" of tread remaining, according to tire experts, your tires are unsafe.

Under dangerous driving conditions, reduced speed and extra caution are obvious accident prevention measures. However, a double measure of safety is to keep your tires in good condition.

**Rotate Your Tires**

You can substantially increase tire life by having them rotated about twice a year. By putting tires in different positions on the car (left front to left rear, left rear to right front, and so on around the car — according to instructions for your make and model), your tires, including the spare, eventually will have taken their turns in all positions, thereby equalizing wear.

This semi-annual procedure also provides a good opportunity for your automotive serviceman to look for cuts, bruises or other damage.

Another part of semi-annual tire care should be a check of wheel balance and alignment. Both have a serious bearing on tire wear and will affect your car’s handling ability and driving comfort.

Once a month, have the air in the tires checked. An underinflated tire will wear rapidly at the outer edges; overinflation causes wear at the center. One final tire care fact especially important during the summer: excessive heat is a tire’s worst enemy. It results from a flexing of the tire body; the faster you drive, and the more load you carry, the more your tires will flex.
Highway Driving Requires Same Car Care as Racing

Mechanical Efficiency Of Vehicle is Vital

By FRED AGABASHIAN, Champion Spark Plug Co. Highway Safety Team

Is highway driving in any way the same as race track driving? In my experiences I've found many similarities.

For example, there isn't a race driver in the world who would go out on a track knowing that his car is not 100% mechanically sound. Shouldn't the average motorist also have this confidence in his own car?

Once you know the vehicle is perfect, you can concentrate on driving skills, without worrying about whether the brakes are going to grab, or whether the tires are safe, or whether the steering components are going to give out at a crucial time.

When your car is in excellent condition, you have confidence in it, and your driving ability reflects this confidence.

Escape Route Plan

Another similarity I find between highway driving and race driving is what I call "the escape route plan." Planning ahead while driving helps keep me alert and helps keep my mind on my driving. In my own mind I've been on the shoulders of expressways and in ditches all over the country. In fact, I've always "driven" the grass infield of the Indianapolis Speedway with every circuit, and several times, having an escape route like this has helped and saved my car.

Driver attitude also plays an important role, whether on the highway, or on the race track. The racing driver with an immature attitude, one who loses his temper, one who "gets even" with other drivers or one who shows off, soon finds himself out of the racing business — in one way or another.

Similarly, immaturity catches up with the motorist on the street. They are the ones who leave a stretch of rubber at traffic lights, who pass on curves and hills, and weave in and out of traffic, and ones who have unnecessary — and distracting — duds hanging around the rear window and mirrors.

Word of Caution

I'm not saying that an expert driver on the highway can take the wheel of a race car and come out with a good showing. But he is the kind of driver who has the qualifications and prerequisites that are necessary for further training which could make him a professional driver.

Word of Caution

Tire care plays an important role in highway driving and race driving. The racing driver knows that his car is in top condition, and he concentrates on driving skills without worrying about the condition of the tires. The average motorist should also have this confidence in his own car.

B.F. Goodrich INTRODUCES LIFESAVER RADIAL

★ 167% more mileage
★ 100% stronger
★ 28% better stopping on wet pavement
★ 43% wider tread

*All comparisons to the popular B.F. Goodrich Long Miler

4 Belt plies of Dynacor® rayon cord for better tread stability, longer tread mileage, greater tire strength.

2 Radial plies of Dynacor® rayon cord for smoother ride, superior control.
We see warning signals every day of our lives, whether at work, at home or on the road. How many do YOU take heed to?

To be a safe driver you must take heed to warnings when you are faced with them. If you don’t your family might be having supper alone tonight because you won’t be able to make it. You might just have an accident and have to spend the evening elsewhere.

John Beck, Tom Taylor, Wayne Hyde, Gary Hyde and Dan Beck look over some of the 15 new 1971 models of Ski Doo and Evinrude Snowmobiles, ranging in size from 12 h.p. to 40 h.p., on display at Beck & Hyde Farmarina. Also on display are brand new 1970 models starting from $595.00.
