In our opinion...

Inflation may still be soaring with most controls having little success. The vice-president of the United States may face criminal proceedings. Unemployment is still a great national problem. Our defense programs must be trimmed to avoid domestic programs being cut. Financing education is still a problem facing districts throughout the nation. But the key word is "key." The important thing is that our nation's leaders don't take little action. Without hesitation, they should have stepped in and saved the day for millions of football fans who would rather sit at home in front of television than buy a ticket.

If Congress hasn't assumed such a hard line of reason and initiated such clear sighted action, it is difficult to think of what shape the nation might be in today.

A PERSONAL LOOK AT THE NEWS

Between the lines

with Jim Edwards

Fall is a uniquely conducive season for household tasks.

No other season offers the unique opportunity to complete household chores in the cooler, more pleasant weather.

The cool, casual atmosphere makes it easier to spend the day doing the tasks normally reserved for the winter.

So, take advantage of the fall season and tackle those household projects that have been neglected due to the heat of summer.

Fall is a great time to perform maintenance on your home.

Whether it's painting, cleaning, or even updating the landscaping, the fall weather is perfect for such activities.

Here are some ideas to get you started:

- Painting: Fall is ideal for exterior painting as the leaves fall, creating a cleaner environment for painting. Also, the cooler temperatures help paint dry faster.
- Cleaning: Use the fall to deep clean your home. The extra time spent now will pay off in the months to come.
- Landscaping: Fall is a great time for landscaping as plants are dormant and require less maintenance.

Taking advantage of the fall season will not only improve the appearance of your home but also make it more energy efficient and comfortable.

4. Closing: The final step is choosing a mortgage and closing on the home.

It's important to understand the terms and conditions of a mortgage before signing any documents. A mortgage is a significant financial commitment, and it's crucial to make a well-informed decision.

You can't eat the why pay for it?

You can't eat the why pay for it?

You can't eat the why pay for it?
Quality and selection are nothing new at Kroger. We've been in business, now, for nearly 90 years and we've learned to recognize a clear-cut consumer demand for products of national brand quality at less-than national brand prices. With that thought in mind, we've developed one of the most extensive selections of private-label food products available today. We don't select just any product to bear the Kroger label — when we commit our name and reputation to a specific item, it's only after thorough testing and extensive consumer research.

So now you know we make top quality products... but now for the good part — they cost less. By processing our own food products we can eliminate some cost factors and, in turn, pass the savings on to you. The fact is, when you shop for the Kroger label, you can save a substantial amount of your food dollars without sacrificing the high quality you deserve. And even though we may end up with another feather in our cap, there's really no secret as to who the real winner is...YOU!

We Stake our name on it!
