

Tire Facts

Extend the life of your tires

Safety Facts

- ⇒ Properly inflated tires can save 5 cents a gallon in gas
- ⇒ A well tended tire can last for 40,000 to 80,000 miles
- ⇒ Under inflated tires can build up heat, which could cause potentially fatal blowouts
- ⇒ Tire pressure is the single greatest cause of tire damage and failure

Maintenance Facts

- ⇒ Have tires balanced and rotated every 5,000 to 8,000 miles
- ⇒ Maintain adequate tread depth on tires, at least 1/16th inch
- ⇒ Have vehicle alignment checked often

When to check Tire Pressure

- ⇒ Check tires when they are cold
- ⇒ Check tires routinely once a month
- ⇒ Check tires before long trips

Environmental Facts

- ⇒ 5% under inflation increases fuel consumption 1%, and releases 1.5 million tons of carbon dioxide (CO₂)
- ⇒ Maintaining proper tire pressure generates less scrap tires per year

Proper Tire Disposal

The Clinton County Department of Waste Management conducts two Clean Community Events every Spring for disposal of various items including tires. There is a minimal fee associated with the disposal. For further information about attending the event, visit our website at www.clinton-county.org/waste or call (989) 224-5186. If this event is not timely enough for your disposal needs, please contact one of the following facilities for disposal:

All-Tech Auto & Towing	(517) 651-5043	Laingsburg
Brogan's Tire Center	(517) 487-5941	Lansing
